Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

- (1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
- (1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.
- (2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.
- (2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing
TABLEAU 4. Indices des prix des produits industriels par étape de transformation

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

NOTE TO USERS

Raw Materials Price Indexes (Table 6)

Due to a correction in the potato index dating back to September 1992, the indexes for fresh vegetables, vegetable products, total raw materials and total raw materials excluding mineral fuels may have been revised back to September 1992.

AVIS AUX UTILISATEURS

Indices des prix des matières brutes (Tableau 6)

Veillez noter qu'en raison de la révision de l'indice des pommes de terre remontant à septembre 1992, les indices des légumes frais et des préparations à base de légumes, l'indice d'ensemble des matières brutes et l'indice d'ensemble à l'exclusion des combustibles minéraux peuvent avoir été révisés rétrospectivement jusqu'en septembre 1992.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitué recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Document de référence

Voir le document de référence de l'IPPI, qui contient le schéma de pondération des indices de prix des matières brutes.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

**ELECTRIC POWER SELLING PRICE
INDEXES (NON-RESIDENTIAL),
1986 = 100**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

**INDICES DES PRIX DE VENTE DE L'ÉNERGIE
ÉLECTRIQUE (NON RÉSIDENTIELLE),
1986 = 100**

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Robin Lowe (613-951-3370), or Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec la Sous-section de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Robin Lowe (613-951-3370) ou Bernard Lupien (613-951-9605).

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries. Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax – the same day of release – for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique annuel à titre gracieux**.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

MERCI DE VOTRE COMMANDE!

Canada

*Don't let the changing world
take you by surprise!*

*Ne soyez pas dépassé
par les événements!*

An aging population. Lone-parent families. A diverse labour force. Do you know how today's social changes will affect your future ... your organization ... and your family?

Keep pace with the dramatic shifts in Canada's evolving social fabric with Statistic Canada's best-selling quarterly, *Canadian Social Trends*. With vast and varied reports on major changes in key social issues and trends, this periodical incorporates findings from over 50 national surveys.

Written by some of Canada's leading-edge social analysts, *Canadian Social Trends* combines painstaking research with dynamic prose on topics like ethnic diversity, low-income families, time-crunch stress, violent crime and much more — all in a colourful, easy-to-read, magazine format.

A lasting record of changing times!

Join the thousands of business and policy analysts, social-science professionals, and academics who trust *Canadian Social Trends* to demystify the causes and consequences of change in Canadian society. Don't miss a single issue — subscribe today.

***Canadian Social Trends* (catalogue number 11-0080XPE) is \$34 annually in Canada, US\$41 in the United States and US\$48 in other countries.**

Le vieillissement de la population. Les familles monoparentales. La diversification de la population active. Savez-vous comment les changements sociaux d'aujourd'hui vont se répercuter sur votre avenir, votre organisation, votre famille?

Suivez l'évolution spectaculaire de la société canadienne grâce à *Tendances sociales canadiennes*, une publication trimestrielle de Statistique Canada. Avec des articles vastes et variés sur les principaux changements caractérisant les questions et les tendances sociales principales, cette publication intègre les résultats de plus de 50 enquêtes nationales.

Certains des analystes sociaux les plus reconnus du Canada rédigent des articles dans *Tendances sociales canadiennes*. Ils présentent les résultats de recherches minutieuses dans un style attrayant pour des sujets tels que la diversité ethnique, les familles à faible revenu, le stress dû au manque de temps, le crime et bien d'autres encore dans une revue haute en couleur et de lecture aisée.

Un dossier permanent d'une époque en évolution!

Des milliers d'analystes des entreprises et des politiques, de professionnels des sciences sociales et d'universitaires lisent *Tendances sociales canadiennes* pour identifier les causes et les conséquences de l'évolution de la société canadienne. Ne manquez pas un numéro, abonnez-vous dès aujourd'hui.

L'abonnement annuel à *Tendances sociales canadiennes* (n° 11-0080XPF au catalogue) coûte 34 \$ au Canada, 41 \$ US aux États-Unis et 48 \$ US dans les autres pays.

THE 1994 CANADA YEAR BOOK

*Your indispensable and
comprehensive reference
source on Canada*

For essential information on Canada, turn to the *Canada Year Book*. An invaluable resource, the 1994 edition is beautifully designed in an inviting and easy-to-read format.

The 1994 *Canada Year Book* examines recent events, changes and trends in great detail. Organized carefully into 22 chapters, it answers questions on virtually every topic from geography through health to banking.

This edition features:

- ▶ Over 700 crisply written pages packed with eye-opening information on life in Canada — from social, economic, cultural and demographic perspectives
- ▶ 250 concise tables plus 63 charts and graphs that put statistical information into focus
- ▶ Stunning photographs capturing distinctively Canadian scenes by some of this country's finest photographers
- ▶ Fascinating short feature articles covering everything from archaeology to white collar trends

Trusted for over 125 years by students, teachers, researchers, librarians and business people, the *Canada Year Book* is the reference source to consult first on all aspects of Canada.

An enduring addition to any home or office library!

ORDER YOUR COPY OF CANADA YEAR BOOK TODAY.

Available in separate English and French editions, the 1994 *Canada Year Book* (Catalogue No. 11-402E) is \$59.95 plus \$5.05 shipping and handling in Canada, US \$72 in the United States, and US \$84 in other countries.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, Ottawa, Ontario K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and charge it to your VISA or MasterCard.

L'ANNUAIRE DU CANADA 1994

*Un ouvrage complet et
indispensable sur le Canada*

Pour obtenir des renseignements essentiels sur le Canada, consultez *l'Annuaire du Canada*. Inestimable source d'information, l'édition de 1994 est un ouvrage d'une présentation très soignée, attrayant et facile à lire.

L'Annuaire du Canada 1994 étudie en profondeur les événements, les tendances et les changements récents. Divisé en 22 chapitres, il répond à vos questions sur presque tous les sujets, depuis la géographie jusqu'à la santé et la banque.

Voici ce que vous trouverez dans l'édition de 1994 :

- ▶ Plus de 700 pages écrites dans un style vif et pleines de renseignements intéressants sur les dimensions sociales, économiques, culturelles et démographiques de la vie canadienne
- ▶ 250 tableaux concis et 63 graphiques et diagrammes qui permettent de mettre en perspective l'information statistique
- ▶ Remarquables photographies de paysages typiquement canadiens par certains des photographes canadiens les plus illustres
- ▶ Courts articles fascinants sur des sujets divers, depuis l'archéologie jusqu'à l'évolution de la situation des cols blancs

Ouvrage de référence de prédilection des étudiants, des enseignants, des chercheurs, des bibliothécaires et des gens d'affaires, et ce depuis plus de 125 ans, *l'Annuaire du Canada* est celui qu'il faut consulter en premier pour en savoir plus long sur tous les aspects du Canada.

Un volume que vous voudrez conserver longtemps dans votre bibliothèque ou au bureau!

COMMANDEZ DÈS AUJOURD'HUI VOTRE EXEMPLAIRE DE L'ANNUAIRE DU CANADA

Vous pouvez vous procurer la version française ou anglaise de *l'Annuaire du Canada 1994* (no 11-402F au catalogue) au coût de 59,95 \$ (supplément de 5,05 \$ pour les frais d'expédition et de manutention) au Canada, 72 \$ US aux États-Unis et 84 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, Ottawa (Ontario) K1A 0T6, ou communiquez avec le centre de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone:

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolingué et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Note of Appreciation

*Canada owes the success of its statistical system to
a long-standing cooperation involving Statistics
Canada, the citizens of Canada, its businesses,
governments and other institutions. Accurate and
timely statistical information could not be produced
without their continued cooperation and goodwill.*

Note de reconnaissance

*Le succès du système statistique du Canada repose
sur un partenariat bien établi entre Statistique Canada
et la population, les entreprises, les administrations
canadiennes et les autres organismes. Sans cette
collaboration et cette bonne volonté, il serait impossible
de produire des statistiques précises et actuelles.*

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

HIGHLIGHTS

Industrial Product Price Index

Preliminary data indicate that foreign buyers are paying for the continuing strong increase in prices for industrial products. High foreign demand for exports kept the annual increase in industrial product prices in October at more than 6% for a fifth straight month. Although there were some signs of potential pressure on consumer prices, these remain muted.

The annual change in the IPPI edged back up to 6.5% as prices rose 0.6% from September. The increase was fueled by pulp, non-ferrous metal products and motor vehicles. Since June, the year-over-year change in manufacturer prices has been at a 12-year high.

At the manufacturer level, the year-over-year price increase for consumer goods was about 2.4% in October. This excludes the immediate effects of changes in value of the Canadian dollar. The year-over-year change in the good's component of the CPI was about half that amount. This excludes the effect of the drop in tobacco taxes in Eastern Canada.

October was the third month when the year-over-year change in manufacturer prices was about a percentage point higher than that of consumer prices. However, only about half of the consumer's dollar goes to manufacturers. The remainder goes to retailers, wholesalers, transportation companies, and taxes. Faced with a relatively weak retail market, it would seem that middlemen and retailers are absorbing part of the increase in manufacturer prices while trying to hold down labour and other costs.

The year-over-year change in manufacturer prices in Canada remained much higher than in other members of the G7 group of industrialized nations. It was over twice the size of the increase in Germany and the United Kingdom. It was quadruple the increase in the United States. The structure of the Canadian economy and the effect of changes in international exchange rates continued to be important contributors to the differences in price changes.

FAITS SAILLANTS

Indice des prix des produits industriels

Selon les données provisoires, les acheteurs étrangers assument la forte hausse soutenue des prix des produits industriels. La demande étrangère élevée pour les exportations a maintenu à plus de 6% la progression annuelle des prix des produits industriels en octobre et ce, pour le cinquième mois consécutif. Toutefois, certains signes d'éventuelle pression sur les prix à la consommation, qui existent bel et bien, demeurent atténués.

La variation annuelle de l'IPPI a lentement monté à 6,5%, les prix étant supérieurs de 0,6% au niveau atteint en septembre. L'accroissement est attribuable à la pâte de bois, aux produits métalliques non ferreux et aux véhicules automobiles. Depuis juin, la hausse d'une année à l'autre des prix des fabricants a atteint un niveau inégalé en douze ans.

Au niveau du fabricant, l'augmentation d'une année à l'autre des prix des biens de consommation se fixait à environ 2,4% en octobre. Ce pourcentage ne tient pas compte des répercussions immédiates des fluctuations de la valeur du dollar canadien. La variation d'une année à l'autre de la composante des biens de l'IPC atteignait environ la moitié de cette valeur. On tient compte en l'occurrence de la baisse des taxes sur le tabac dans l'Est du pays.

Pour le troisième mois consécutif, la variation d'une année à l'autre des prix des fabricants dépasse d'environ 1 point celle des prix de consommation. Toutefois, les fabricants ne touchent qu'environ la moitié du dollar de consommation. Le reste est réparti entre les détaillants, les grossistes, les entreprises de transport et sert à payer les impôts. Dans le contexte d'un marché de détail relativement faible, il semble que les intervenants et les détaillants assument une partie de la hausse des prix des fabricants, tout en essayant de freiner l'augmentation des coûts de la main-d'oeuvre et des autres coûts.

La variation d'une année à l'autre est demeurée bien plus élevée au Canada que dans les autres pays qui font partie du Groupe des Sept nations industrialisées. Ce pourcentage était plus de deux fois supérieur à celui enregistré en Allemagne et en Grande-Bretagne. Il était quatre fois supérieur à celui observé aux États-Unis. La structure de l'économie canadienne et l'incidence des fluctuations des taux de change internationaux ont continué de jouer un rôle important au plan des divergences relatives aux variations de prix.

Inflationary pressures on manufacturer prices continued to come primarily from exported intermediate goods particularly pulp, non-ferrous primary metals, and paper. They also continued to be driven by demand. The decline in the annual change in finished goods' prices (from +3.0% to +2.6%) was rooted in exchange rates, not in domestic events.

Overall, conditions remained good for Canadian producers while consumers did not see any strong rise in prices. The continuing strength of exports and investment, together with lack of any widespread increase in consumer spending, suggests this may continue. There are, however, beginnings of some overall upward pressure on a range of prices.

The annual new model price changes for cars and vans, combined with the price rise in pulp and non-ferrous metals, led the price increases in manufactured goods. The most important price declines were for wood and petroleum products.

The change in the motor vehicle price index took into account an estimated price increase of about 4% for the introduction of 1995 cars and vans.

Rising world demand for pulp and paper products continued to drive prices up. In October, pulp was up 8.9% over September 1994 and 61.6% over October 1993. Paper was up 2.0% over September and 8.4% over October 1993. Driven by demand for containers, paper products prices were up 2.2% over September and 7.1% over October 1993. The rising demand for pulp has pulled up prices of various chemical inputs (such as caustic soda) used in its manufacturing process.

Les tensions inflationnistes sur les prix des fabricants continuent d'être en majeure partie attribuables aux produits semi-finis à l'exportation, en particulier la pâte de bois, les métaux primaires non ferreux et le papier. Elles demeurent également régies par la demande. On constate une baisse de la variation annuelle des prix des produits finis, qui est passée de 3,0% à 2,6%, qui découle du mouvement des taux de change et non pas de ce qui s'est passé au pays.

Dans l'ensemble, les conditions sont demeurées favorables pour les producteurs canadiens, tandis que les consommateurs canadiens n'ont pas subi de fortes hausses des prix des biens de consommation. La vigueur soutenue des exportations et des investissements, de même que l'absence de toute hausse généralisée des dépenses des consommateurs, laisse croire que cette tendance pourrait se poursuivre. On observe toutefois qu'une gamme de prix commence à subir une certaine pression à la hausse globale.

Les variations annuelles du prix des nouveaux modèles d'automobiles et de camions, combinées à la majoration du prix de la pâte de bois et des métaux non ferreux, sont les principaux facteurs à l'origine des hausses de prix des produits manufacturés. Les diminutions de prix les plus importantes ont été enregistrées pour le bois et les produits du pétrole.

La variation de l'indice des prix des véhicules automobiles tient compte du résultat d'une majoration de prix estimée d'environ 4% attribuable à l'introduction des modèles 1995 d'automobiles et de camions.

L'accroissement de la demande mondiale de pâte de papier et de produits du papier a continué de faire monter les prix. En octobre, la pâte de bois a augmenté de 8,9% par rapport à septembre 1994 et de 61,6% par rapport à octobre 1993. Le papier s'est accru de 2,0% par rapport à septembre, et de 8,4% par rapport à l'année précédente. Régis par la demande de contenants, les produits du papier ont augmenté de 2,2% par rapport à septembre, et de 7,1% par rapport au mois d'octobre précédent. Pour ce qui est de la pâte de bois, la progression de la demande a provoqué une montée des prix des diverses matières premières chimiques, notamment la soude caustique utilisée dans le processus de fabrication.

The increases in non-ferrous metals' prices in October were led by primary aluminum products prices. These jumped 7.6% since demand for aluminum is expected to increase while the world recovery continues. The increases included nickel but not copper, which suffered a price correction after September's increase.

Wood prices dropped 1.5% in October. Inventories were high, construction was not strong, and winter was on the horizon.

Petroleum product prices continued to decline in October. Price declines were led by gasoline, down 4.8% from September. However, prices rose for some petrochemicals, particularly ethylene and two of its products, styrene and vinyl chloride. Chemical plant explosions in the United States at the end of the summer helped reduce supply when world demand was rising. Plastic fabricated products prices have been increasing for some time because of pressure from petrochemicals' prices.

Les produits de l'aluminium de première transformation viennent en tête pour ce qui est des hausses des prix des métaux non ferreux en octobre. Ces produits ont augmenté de 7,6%, étant donné qu'on prévoit que la demande pour l'aluminium progressera au rythme de la reprise mondiale. Ces hausses ne comprennent pas le cuivre, dont le prix a été rectifié après l'augmentation de septembre. Elles englobent toutefois le nickel.

Les prix du bois ont diminué de 1,5% en octobre, les stocks étant élevés, la construction étant au ralenti et l'hiver s'annonçant.

Les prix des produits du pétrole ont poursuivi leur repli en octobre. L'essence, en baisse de 4,8% par rapport à septembre, vient en tête des diminutions de prix. Toutefois, les prix de certains produits pétrochimiques, en particulier ceux de l'éthylène et de deux de ses dérivés, le styrène et le chloréthylène, ont augmenté. Des explosions d'usines chimiques aux États-Unis à la fin de l'été ont contribué à réduire les approvisionnements au moment où la demande mondiale montait. Les produits en matière plastique augmentent depuis un certain temps en raison de la pression exercée par les prix des produits pétrochimiques.

HIGHLIGHTS

Raw Materials Price Index

Raw materials prices have begun to level off in the latest three months, which has helped some manufacturers hold their costs down. Lower prices for crude oil, hogs, certain grains, and oilseeds were major contributors to this levelling off.

Ferrous materials prices, which had been consistently edging upward until April, have been reasonably stable for the latest six months. Wood prices, the major contributor to raw materials price increases in 1993, have not had the same impact in 1994. Nevertheless, they have been increasing slowly in 1994. In 1994, increasing non-ferrous metals' prices moving up since November 1993 have replaced wood as the main contributor to higher raw materials prices.

Crude oil prices declined more than 12% in the latest three months after increasing almost 44% in the first seven months of 1994. Although the recent OPEC meeting agreed to hold the supply constant for the near future, there now appear to be ample supplies of crude due to mild weather and production from non-OPEC members. This may foreshadow a further weakening of crude oil prices.

Due to increased industrial activity in the G7 countries, further increases in non-ferrous metals' prices may be forthcoming. Even with an increase of almost 40% so far in 1994, non-ferrous metals' prices have a long way to go to reach all-time highs. In October nickel prices were only about 33% of their all-time high. Copper, lead, zinc, and aluminum materials were within 75% to 85% of their all-time highs. One group of metals that has already far surpassed its all-time high is the miscellaneous refined metals, which contains metals such as bismuth and antimony. This group has already almost doubled their prices in 1994.

FAITS SAILLANTS

Indice des prix des matières brutes

Les prix des matières brutes ont commencé à se stabiliser au cours des trois derniers mois, permettant ainsi à certains fabricants de maintenir leurs coûts à la baisse. La chute des prix du pétrole brut, des porcs, de certaines céréales et des graines oléagineuses a le plus contribué à la stabilisation des prix.

Les prix des matières ferreuses, qui ont été légèrement à la hausse jusqu'en avril, ont été plus ou moins stables au cours des six derniers mois. Les prix du bois, qui expliquent en majeure partie la progression des prix des matières brutes en 1993, n'ont pas eu la même incidence en 1994. Néanmoins, ils ont augmenté progressivement en 1994. Les métaux non ferreux ont remplacé le bois comme facteur déterminant du mouvement à la hausse des prix des matières brutes en 1994. Leurs prix n'ont cessé de croître depuis novembre 1993.

Les prix du pétrole brut ont régressé de plus de 12% au cours des trois derniers mois, après avoir augmenté de près de 44% au cours des sept premiers mois de 1994. Bien qu'à la récente réunion de l'OPEP il a été convenu de maintenir l'offre constante dans un avenir immédiat, il semble maintenant que les approvisionnements en pétrole brut soient très élevés en raison de la clémence de la température et de la production des pays hors OPEP. Cette situation laisse prévoir un fléchissement accru des prix du pétrole brut.

Vu l'accroissement de l'activité industrielle dans les pays du Groupe des Sept, nous pourrions observer d'autres hausses des prix des métaux non ferreux. Malgré la progression de près de 40% inscrite jusqu'ici en 1994, les prix de ces métaux sont loin d'atteindre les sommets déjà enregistrés. En octobre, les prix du nickel n'atteignaient seulement qu'environ 33% de leur sommet historique, les prix du cuivre, du plomb, du zinc et de l'aluminium atteignant de 75% à 85% de leur sommet respectif. L'un des groupes de métaux qui a déjà dépassé le sommet enregistré est celui des autres métaux d'affinage qui comprend des métaux comme le bismuth et l'antimoine. Les prix pour ce groupe sont déjà presque deux fois plus élevés en 1994.

After an eight-month decline, October hogs prices dropped to their lowest level since the first quarter of 1992. The recent decline was due to the large number of hogs and to the unwillingness of producers to carry stocks over the winter.

Corn prices have dropped in the latest four months. Oilseeds, mainly soybeans and canola, have significantly declined in price in the latest four and five months respectively. The price decline in oilseeds, especially canola, may be only a temporary correction. Foreign markets appear to view canola as a premium oilseed. Accordingly, canola exports year-to-date have almost doubled from the same period last year.

Ferrous materials prices were led by higher prices for iron and steel scrap over the past two years. Scrap prices may be experiencing some resistance to higher prices vis à vis the purchase of iron ore. Iron ore prices, which did not experience anywhere near the price increase of iron and steel scrap, have appeared to be in a holding pattern over the latest 15 months.

Wood was the major contributor to raw materials price changes in 1993. In 1994 price changes for wood have not been as dramatic but have still been moving slowly upward. Prices for pulpwood should at least continue increasing in the short term due to the demand for pulp and paper.

Après avoir diminué pendant huit mois, les prix des porcs ont atteint, en octobre, leur niveau le plus bas depuis le premier trimestre de 1992. La récente chute est attribuable au grand nombre de porcs sur le marché et au refus des éleveurs de maintenir leurs stocks pendant les mois d'hiver.

Les prix du maïs ont régressé au cours des quatre derniers mois. Les prix des graines oléagineuses, surtout le soja et le canola, ont chuté considérablement au cours des quatre et cinq derniers mois respectivement. Le recul des prix dans les oléagineuses, spécialement dans le cas du canola, pourrait être passager. Les marchés étrangers semblent considérer le canola comme une graine oléagineuse de qualité supérieure. En effet, jusqu'ici, en 1994, les exportations de canola ont presque doublé par rapport à la même période de l'an dernier.

Au cours des deux dernières années, les prix des matières ferreuses ont progressé sous l'effet de l'augmentation des prix des déchets de fer et d'acier. Les prix des déchets de métaux semblent vouloir résister quelque peu à la croissance des prix du minerai de fer. Ces derniers, qui n'ont jamais affiché une hausse aussi élevée que les prix des déchets de fer et d'acier, semblent s'être stabilisés au cours des 15 derniers mois.

Les prix du bois ont été le principal facteur d'entraînement des mouvements des prix des matières brutes en 1993. En 1994, ces mouvements ont été moins importants mais ont quand même affiché une tendance à la hausse. Les prix des pâtes de bois devraient continuer d'augmenter du moins à court terme en raison de la demande de pâtes et de papier.

CONSUMER AND PRODUCER PRICES: WHY THEY ARE MOVING DIFFERENTLY

Prepared by Gordon R. Davies¹

The prices received by Canadian producers for their products have been rising sharply over the last few months. It is, however, unlikely that there will soon be a sharp rise in Canadian consumer inflation as a result of this. The principal inflationary pressures are coming from certain processed raw material goods where there is a strong world demand and current Canadian production levels are near full capacity. Generally, however, events outside Canada determine both the world's production and price levels for these products. It would appear that some inflationary pressure on consumer goods prices may be beginning to build because of increases in prices at the manufacturing level. However, the lack of strong retail sales may reduce the ability of goods wholesalers and retailers to pass along producer price increases.

It is useful to put Canadian prices and wages into context by comparing Canadian circumstances to those of the other members of the G7 group of industrialized nations.

Based on the numbers quoted by "The Economist" in early December, Canada has the lowest annual change in consumer prices at -0.2%. The reduction in tobacco taxes in Canada near the beginning of the year accounts for part of this. Nevertheless, if we remove the effect of the change in tobacco product prices to consumers, the year-over-year change in the Canadian CPI remains at only 1.3%. Only Japan has a lower change in annual consumer prices than this. When it comes to wages, the year-over-year change in earnings in Canada is second lowest in the G7. Only Japan is lower. The situation is very different for producer prices. The year-over-year change in producer prices is highest in Canada. It is over 5 percentage points higher than in the United States and over 3.5 percentage points higher than in Great Britain, Germany and France. The year-over-year change in Canadian producer prices is also a lot higher than in Canadian wages and consumer prices.

LA DIFFÉRENCE ENTRE LES MOUVEMENTS DE PRIX À LA CONSOMMATION ET LES PRIX À LA PRODUCTION

Préparé par Gordon R. Davies¹

Les prix des produits fabriqués par les producteurs canadiens ont connu une progression rapide au cours des derniers mois. Cependant, il n'y a pas beaucoup de chance que cela provoque une hausse prochaine du taux d'inflation au Canada. Les principales forces inflationnistes sont surtout causées par la hausse des prix de certaines matières premières travaillées où la demande mondiale est forte et où les niveaux de production actuels au Canada ont presque atteint leur capacité maximale. Toutefois, en général, tant les niveaux de production que les prix mondiaux de ces produits dépendent de ce qui se passe à l'étranger. Il semble cependant que les prix des biens de consommation commencent à ressentir une certaine pression à la hausse attribuable aux augmentations de prix à l'étape de la fabrication. Cependant, il se peut que la faiblesse des ventes au détail réduise la capacité des grossistes et détaillants de biens de transmettre les majorations de prix.

Il est utile de mettre les prix et les salaires canadiens en perspective, en comparant la conjoncture canadienne à celle des autres pays industrialisés du G7.

Selon les statistiques parues dans "The Economist" au début de décembre, le Canada affiche les plus faibles variations d'une année à l'autre des prix à la consommation soit -0,2%. La baisse des taxes sur le tabac au début de l'année explique en partie ce phénomène. Toutefois, si on enlève l'effet du changement de prix des produits du tabac, la variation d'une année à l'autre de l'IPC canadien demeure à seulement 1,3%. Seul le Japon a une variation plus faible que celle-ci. En ce qui a trait aux salaires, la variation au Canada est la deuxième plus basse du G7 après le Japon. Il en va tout autrement dans le cas des prix des producteurs, pour lesquels le Canada affiche la plus forte variation d'une année à l'autre. Cette variation dépasse de plus de 5 points celle des États-Unis et de 3,5 points celle de la Grande-Bretagne, de l'Allemagne et de la France. La variation d'une année à l'autre des prix des producteurs au Canada est également beaucoup plus élevée que les salaires et les prix à la consommation.

¹ Statistician in Prices Division, 613-951-3379

¹ Statisticien de la Division des prix, 613-951-3379

At first glance, it would seem that Canada could be on the verge of a large increase in consumer prices. This increase might, in turn, be passed through into wages and set off a new inflationary spiral. However, the first impression misses some important elements.

To understand why this is so, it is useful to see where the increases in Canadian producer prices have been originating. As can be seen in Chart 1, the year-over-year change in producer prices has been concentrated in the area of intermediate rather than final goods. [Intermediate goods are goods used primarily to produce other goods. Finished goods are goods that most commonly go directly into either consumption or investment.]

De prime abord, le Canada semble donc être à la veille d'une augmentation massive des prix à la consommation, qui pourrait se répercuter sur les salaires et déclencher une nouvelle poussée inflationniste. Cependant ces craintes sont sans fondement.

Pour comprendre ce phénomène, il est utile de déterminer d'où proviennent les majorations des prix des producteurs au Canada. Comme l'indique le graphique 1, la variation d'une année à l'autre des prix des producteurs a été concentrée dans le secteur des produits semi-finis plutôt que dans celui des produits finis. (Les produits semi-finis sont des produits qui servent principalement à la production d'autres biens, alors que les produits finis sont le plus souvent utilisés pour la consommation immédiate ou les investissements.)

Chart 1

Percentage Change in Intermediate Goods and Finished Goods from the Same Month of the Previous Year

Graphique 1

Taux de variation des Produits semi-finis et des Produits finis par rapport au mois correspondant de l'année précédente

The categories of producers enjoying the largest (in relative terms) and most significant (in terms of their role in manufacturing) price increases have been those making pulp and non-ferrous metal products (which includes aluminum, copper, nickel, lead and zinc products). Lumber and timber together with newsprint and other paper also contributed noticeably to the overall increase in the price index for intermediate goods. The combined effect of the year-over-year change in prices for wood, pulp, paper, and non-ferrous metal products accounted for half the total year-over-year increase in the Canadian producer product index in October, about 3% of the total 6% increase.

Over half of the Canadian output of all these commodities are exported, over 80 per cent in the case of pulp. Conversely, these commodities (lumber and timber, pulp, paper, and non-ferrous metals), even when combined, make up only one to two percent of the total inputs into the Canadian economy. The result is that they can give a relatively small price shock to the general level of prices in Canada.

These commodities have all enjoyed a strong increase in world demand that has increased world prices. For example, the producer price index for pulp stood over 60 percent higher in October 1994 than it did in October 1993. In addition, Canadian producers of these goods benefited from the fact that the price of much of their output was denominated in US dollars. On November 15, 1994, the value of the American dollar in terms of the Canadian dollar was over 3 percent higher than on November 15, 1993. [As recently as June 15, it had been over 8 percent higher than a year earlier]. The decline in the value of the Canadian dollar pushed up the prices Canadian producers received from foreigners even further. For every one percent the American dollar rose against the Canadian dollar, the price index for lumber and wood products went up an additional 0.3%, that for pulp went up 0.6%, that for paper went up 0.5%, and that for aluminum and nickel went up 0.8% and 0.7% respectively.

En termes relatifs, et en termes de leurs rôles dans le secteur manufacturier, ce sont les producteurs de pâte et de produits métalliques non ferreux (qui comprennent l'aluminium, le cuivre, le nickel, le plomb et les produits du zinc) qui ont enregistré les majorations de prix les plus substantielles. Les billes et le bois d'oeuvre, le papier journal et les autres papiers, ont aussi contribué de façon appréciable à la progression globale de l'indice des prix des produits semi-finis. L'effet combiné de la variation d'une année à l'autre des prix du bois, de la pâte, du papier et des produits métalliques non ferreux représente environ la moitié de la hausse globale d'une année à l'autre de l'indice des entrées totales dans l'économie canadienne en octobre, soit environ 3% de la majoration totale de 6%.

Plus de la moitié de la production canadienne de ces biens est exportée, cette proportion dépassant 80% dans le cas de la pâte. Inversement, même une fois combinés, ces biens (billes et bois d'oeuvre, pâte, papier et métaux non ferreux) ne représentent qu'un ou 2 pourcent des entrées totales dans l'économie canadienne. Ils ne peuvent, en conséquence, qu'exercer une incidence relativement mineure sur le niveau général des prix au Canada.

On a enregistré, pour chacun de ces produits, une forte croissance de la demande mondiale qui s'est traduite par un mouvement à la hausse des prix. Ainsi, dans le cas de la pâte, l'indice des prix des producteurs était plus de 60% plus élevé en octobre 1994 qu'en octobre 1993. En outre, les fabricants canadiens de ces produits ont bénéficié du fait que le prix de la majeure partie de leur production était libellée en dollars US. Du 15 novembre 1993 au 15 novembre 1994, la valeur du dollar américain par rapport au dollar canadien s'est accrue de 3%. (De fait, pas plus tard que le 15 juin, l'écart entre les deux devises avait augmenté de plus de 8% comparativement à l'année précédente). Cette baisse de la valeur du dollar canadien s'est traduite par une nouvelle majoration des prix touchés par les producteurs canadiens sur les marchés étrangers. Chaque augmentation de 1% de la devise américaine par rapport à la devise canadienne a eu pour effet de faire progresser l'indice des prix du bois d'oeuvre et autres produits du bois d'un autre 0,3%, celui de la pâte de 0,6%, celui du papier de 0,5%, et ceux de l'aluminium et du nickel de 0,8% et de 0,7% respectivement.

Amongst the G7, only in Canada do lumber, pulp, paper, and non-ferrous metals play such a large role in the economy and, therefore, in the producer price index. The producer price indexes of the other countries have thus not received the impetus that the Canadian producer price index has received from the increase in demand for these products.

Overall, the movements in the exchange rate between the Canadian and American dollar have contributed in a large way to the increase in Canadian producer prices. In October it accounted for 0.3% percentage points, but as recently as June, the first month that the annual change in producer prices passed 6%, it accounted for about 1.7 percentage points, or over a quarter of the annual increase.

Producers in the other members of the G7 also have not received the improvement in their international competitive position due to exchange rate movements that Canadian producers have received. It is difficult to quantify the effect of these exchange rate movements. The currencies of Canada, the United States, Japan, and the members of the European community have all moved relative to each of the others. Nevertheless, one possible measure of the overall impact of exchange rate movements over the last year is available from the OECD. This is the percentage change in "real effective exchange rates", calculated for 24 OECD countries active in 30 markets. A fall in these exchange rates indicates improved competitiveness internationally with respect to exchange rates. Based on the most recent data, the percentage changes for the members of the G7 were: Canada (-5.9 %), Italy (-3.3%), Great Britain (-2.3), the United States (-1.7%), France (+1.6%), Germany (+0.9%) and Japan (+0.2%).

Overall, therefore, the greatest impact of the movement of Canadian industrial prices, has been to Canadian exporters over the last year. The impact on Canadian consumer prices, however, is not likely to be nearly as substantial.

Le Canada est le seul pays du G7 où le bois d'oeuvre, la pâte de bois, le papier et les métaux non ferreux ont une telle importance au sein de l'économie et, partant, une telle incidence sur l'indice des prix des producteurs. En conséquence, l'accroissement de la demande de ces produits n'a pas eu le même effet d'entraînement sur l'indice des prix des producteurs des autres pays que sur celui du Canada.

Dans l'ensemble, la variation des taux de change entre le Canada et les États-Unis a largement contribué à faire augmenter les prix des producteurs canadiens. En octobre, elle a figuré pour 0,3 point de pourcentage, mais aussi récemment qu'en juin, le premier mois où la variation annuelle des prix des producteurs a dépassé 6%, elle a figuré pour environ 1,7 point de pourcentage ou pour plus du quart de la croissance annuelle pour ce mois.

La variation des taux de change n'a pas permis aux producteurs des autres pays membres du G7 d'améliorer leur position concurrentielle sur les marchés mondiaux dans la même mesure que les producteurs canadiens. Il est difficile toutefois de quantifier l'effet de ces mouvements. Les devises du Canada, des États-Unis, du Japon et des pays membres de la Communauté européenne ont toutes fluctué les unes par rapport aux autres. Cependant, l'OCDE nous fournit une mesure possible de l'incidence globale de la variation des taux de change au cours de la dernière année: il s'agit de la variation en pourcentage des «taux de change effectifs réels» calculée pour 24 pays membres de l'OCDE actifs sur 30 marchés. Toute chute de ces taux de change indique une amélioration de la compétitivité internationale à cet égard. Selon les données les plus récentes, les variations en pourcentage enregistrées pour les pays du G7 étaient les suivantes: Canada (-5,9%), Italie (-3,3%), Grande-Bretagne (-2,3%), États-Unis (-1,7%), France (+1,6%), Allemagne (+0,9%) et Japon (+0,2%).

De façon générale, donc, les exportateurs canadiens ont fortement bénéficié du mouvement des prix des produits industriels au cours de la dernière année. En revanche, il est peu probable que l'incidence sur les prix à la consommation au Canada soit, de loin, aussi grande.

Nevertheless, as shown in Chart 2, there does seem to be some upward pressure on CPI goods prices building up from price increases at the producer level. The producer level CPI in Chart 2 represents a proxy of the CPI index at the producer level prepared using information on industrial product price movements. By the late summer, producer prices for goods entering the CPI had begun increasing at a faster rate than did the prices paid at the consumer level.

Néanmoins, comme le montre le graphique 2, il semble y avoir une pression à la hausse sur les prix des biens de l'IPC attribuable à une augmentation des prix des producteurs. L'IPC à la production figurant au graphique 2 est une approximation établie à partir de l'information basée sur les mouvements des prix des produits industriels. À la fin de l'été, les prix des producteurs pour les biens entrant dans le calcul de l'IPC avaient commencé de s'accroître à un rythme plus rapide que les prix à la consommation.

Chart 2

Percentage Change in the CPI Goods, CPI Goods excluding tobacco and Producer CPI from the Same Month of the Previous Year

Graphique 2

Taux de variation des Biens de l'IPC, Biens de l'IPC excluant le tabac et de L'IPC de manufacturier par rapport au mois correspondant de l'année précédente

Although inflationary pressure on consumer prices from manufacturing prices may have begun building, it may be some time before any pressure is transmitted. Only about half the price paid by the consumer ever gets to the producer. The remainder goes in taxes or to transporters, wholesalers, and retailers. With the retail market not strong, wholesalers and retailers may be hesitant about passing along much in the way of producer price increases.

Bien qu'une certaine pression inflationniste sur les prix à la consommation attribuable aux prix des producteurs ait pu commencer à s'exercer, il peut s'écouler un certain temps avant que quelque pression se fasse sentir sur les prix à la consommation. Seulement la moitié environ du prix payé par le consommateur se retrouve finalement dans les poches du producteur, le reste étant prélevé sous forme de taxes ou allant aux transporteurs, aux grossistes et aux détaillants. Compte tenu de la faiblesse du marché du détail, il est possible que les grossistes et les détaillants hésitent à reporter sur le consommateur l'augmentation des prix des producteurs.

As shown in Chart 3, changes in service wages are clearly running below changes in prices paid by consumers for services. Since wages are perhaps the key ingredient in services, it is unlikely that there will be much upward pressure on consumer prices in this sector.

Comme le montre le graphique 3, les salaires versés dans le secteur des services sont nettement inférieurs aux prix payés par les consommateurs pour ces services. Comme les salaires constituent peut-être l'élément clé du secteur des services, il est peu probable qu'ils soient à l'origine d'une forte pression à la hausse sur les prix à la consommation dans ce secteur.

Chart 3

Percentage Change in CPI Services and Service Wages from the Same Month of the Previous Year

Graphique 3

Taux de variation des Services de l'IPC et des Salaires versés par rapport au mois correspondant de l'année précédente

Overall then, there may be some pressure in the next few months on goods prices in the CPI, but little from services. However, even in the goods' market, prices may not rise too noticeably.

Il se peut donc qu'une certaine pression à la hausse s'exerce sur l'IPC des biens au cours des prochains mois, mais probablement pas sur l'IPC des services. Toutefois, même sur le marché des biens, les prix sont peu susceptibles de s'accroître de façon trop marquée.

The ability of wholesalers and retailers to pass along price increases at the manufacturing level is deeply affected by the level of demand for consumer goods. Retail spending has been relatively slow to recover. Real income has been growing very slowly, if at all, for more than a decade. When the average weekly real income of all industrial employees is examined over the years from 1983 to 1993, it was only 0.8% higher in 1993 than in 1988, and it was 1.9% lower than in 1983. This situation has not improved in 1994 either. Since January, the year-over-year change in seasonally adjusted weekly earnings has varied between 1.1% and 2.3%. In the third quarter it ranged from 1.6% to 2.3%. GDP figures for the third quarter of 1994 indicate that although personal income rose marginally, increased taxes reduced personal disposable income. The CPI, once the effect of change in tobacco taxes has been removed, has been running between about 1.3% and 1.6%. In addition, consumer credit is already at an all time high. There is thus no reason to expect that consumers are going to go out and start buying in a big way in the foreseeable future. Such recovery as we have is thus likely to continue to rely on exports and investment, both of which remain healthy.

The ability of labour to secure wage increases affects inflation prospects. Rising wages increase the demand for consumer goods and services, creating demand pull inflation. They also push up the costs to business, creating cost push inflation, especially in the service industries where wages are a large component of costs. According to recent Statistics Canada figures, average hourly earnings have remained unchanged since January 1994. Although the figure for unemployment declined to 9.6% in November, competition for jobs is likely to remain fierce. As unemployment falls, discouraged workers are normally drawn back into the labour force. At the end of the last boom, when perhaps as many people were in the labour force as wanted to be there, the participation rate was running at around 67%, compared to 65% in November 1994. A similar level of labour force participation to that at the end of last boom would add over 400,000 to the labour force and to the unemployment rolls. This would make the unemployment rate over 12% rather than under 10%.

La demande pour les biens des consommateurs influe grandement sur la capacité des grossistes et des détaillants d'intégrer la hausse des prix des producteurs dans leurs prix de vente. Les dépenses de consommation se redressent relativement lentement. Cela n'a rien de surprenant, quand on sait que, depuis plus de dix ans, le revenu réel n'a connu qu'une progression minime sinon nulle. Si on examine l'évolution du revenu réel hebdomadaire moyen de l'ensemble des travailleurs industriels pour la période allant de 1983 à 1993, on constate que, en 1993, celui-ci était 0,8% plus élevé seulement qu'en 1988, mais 1,9% plus bas qu'en 1983. Et les choses ne se sont pas améliorées en 1994. En effet, en janvier, la variation d'une année à l'autre des gains hebdomadaires, après désaisonnalisation, s'est échelonnée de 1,1% à 2,3%. Au troisième trimestre, elle a varié entre 1,6% et 2,3%. Les données sur le PIB pour le troisième trimestre de 1994 indiquent que bien que le revenu personnel ait progressé légèrement, la hausse des impôts a eu pour effet de réduire le revenu personnel disponible. L'IPC, une fois corrigé de l'effet de la baisse des taxes sur le tabac, a progressé à un rythme d'environ 1,3% à 1,6%. Il n'y a donc aucune raison de s'attendre à une recrudescence marquée des dépenses des consommateurs dans un avenir prévisible. Il est par conséquent probable que la reprise continuera d'être alimentée par les exportations et les investissements, et les deux sont en bon santé.

La capacité des travailleurs à augmenter leurs salaires est un facteur déterminant quant aux probabilités d'inflation. Si les salaires augmentent, la demande pour les biens et les services de consommation augmente et crée ainsi une "demande inflationniste". De même ces augmentations poussent à la hausse les coûts des industries particulièrement dans les industries de service où les salaires représentent une grande part des coûts de productions. Selon les données récentes de Statistique Canada, la rémunération horaire moyenne est demeurée inchangée depuis janvier 1994. Quoique les chiffres pour le taux de chômage montrent que celui-ci est tombé à 9,6% en novembre, la concurrence pour les emplois créés restera probablement acharnée. Normalement, quand le chômage baisse, les travailleurs découragés retournent sur le marché du travail. À la fin de la période de prospérité précédente, lorsqu'il y avait probablement autant de personnes faisant partie de la population active qu'il y en avait qui voulaient la rejoindre, le taux d'activité était de 67% environ, comparativement à 65% en novembre 1994. Un niveau d'activité semblable à celui de la fin de la dernière période de prospérité ajouterait plus de 400,000 individus aux rangs des personnes disponibles pour travailler et donc des chômeurs. Le taux de chômage dépasserait ainsi 12%, au lieu de se trouver à moins de 10%.

In conclusion, although Canada continues to have a producer price index running much higher than that in other countries, this is unlikely to have a large impact on inflation in the foreseeable future. The Canadian recovery is likely to continue, fueled by investment and exports, but restricted by relatively weak retail expenditure. While there may be some pressures on consumer goods prices, weaknesses in retail sales may well continue to discourage wholesalers and retailers from passing along producer price increases.

En conclusion, même si le Canada continue d'avoir un indice des prix à la production qui est beaucoup plus élevé que celui des autres pays, il est peu probable que ceci aura de graves conséquences sur l'inflation dans un avenir prévisible. La reprise au Canada se poursuivra probablement, alimentée par les investissements et les exportations, mais elle se trouvera gênée par des dépenses au détail relativement faibles. Bien que certaines pressions puissent s'exercer sur les prix à la consommation, la faiblesse des ventes au détail va probablement continuer de décourager les grossistes et les détaillants à passer aux consommateurs les hausses de prix des producteurs. probablement

	Second-stage intermediate goods – Produits semi-finis de deuxième étape	120.1	119.9	0.2	0.9	5.5
	All finished goods – Tous les produits finis	120.1	119.6	0.4	0.3	2.6
	Finished foods & feeds – Aliments de consommation et alim. pour anim.	121.7	122.1	-0.3	0.4	2.3
	Capital equipment – Matériel capitalisé	122.0	120.9	0.9	0.4	2.7
	All other finished goods – Tous autres produits finis	118.3	117.6	0.6	0.1	2.9
	All manufacturing industries(2) – Industries manufacturières(2):					
	Gross weighted (80 SIC)(2) – Pondération brute (80 CTI)(2)	121.0	120.3	0.6	1.3	6.5
6	Raw materials – Total – Ensemble des matières brutes	122.0	121.5	0.4	-2.6	8.4
	Raw materials – Total – Excl. mineral fuels – Ensemble des matières brutes, sauf combustibles minéraux	131.3	131.0	0.2	0.9	10.9
	Vegetable products – Substances végétales	117.1	116.0	0.9	2.4	17.9
	Animals & animal products – Animaux & substances animales	104.9	105.3	-0.4	-3.0	-4.1
	Wood – Bois	204.9	203.7	0.6	1.1	11.4
	Ferrous material – Matières ferreuses	117.3	119.8	-2.1	4.1	4.5
	Non-ferrous metals – Métaux non ferreux	130.4	129.5	0.7	5.6	42.8
	Non metallic minerals – Minéraux non métalliques	100.9	101.0	-0.1	0.2	2.0
	Mineral fuels – Combustibles minéraux	101.9	101.0	0.9	-11.4	2.2

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total – Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total – Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations
TABLEAU 2. Indices des prix des produits industriels, par produits et agrégations de produits

1986 = 100

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity,

or 91, which indicates a special aggregation

or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate.

For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling.

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Document de référence

Voir le document de référence de l'IPPI, qui contient le schéma de pondération des indices de prix des matières brutes.

**ELECTRIC POWER SELLING PRICE
INDEXES (NON-RESIDENTIAL),
1986 = 100**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

**INDICES DES PRIX DE VENTE DE L'ÉNERGIE
ÉLECTRIQUE (NON RÉSIDENTIELLE),
1986 = 100**

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialities. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec la Sous-section de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Don't let this happen to you!

Imagine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

Infomat is your fastest and easiest way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- ✓ price indexes
- ✓ manufacturing shipments and orders
- ✓ imports and exports
- ✓ labour market conditions, and
- ✓ dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

Infomat is specially designed and written for you – a busy manager with no time to waste!

**Join the confident, successful
decision-makers in the country
and subscribe to Infomat today!**

Infomat (catalogue no. 11-0020XPE) is only \$130 (plus \$9.10 GST) per year in Canada, US\$156 in the U.S. and US\$182 in other countries.

CALL TOLL-FREE 1-800-267-6677 OR

FAX (613) 951-1584 and use your VISA or MasterCard. OR MAIL your order to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6, or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

Ne vous laissez pas dépasser par les événements!

Imaginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous vous êtes fondé sur de l'information incomplète ou périmée!

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez... **Infomat** est pour vous.

Infomat est la façon la plus rapide et la

plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- ✓ indices de prix
- ✓ livraisons et commandes des fabricants
- ✓ importations et exportations
- ✓ situation du marché du travail, et des
- ✓ dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

Infomat est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!

**Faites comme bien d'autres décideurs au
pays qui ont réussi et abonnez-vous à
Infomat aujourd'hui même!**

Infomat (n° 11-0020XPF au catalogue) ne coûte que 130 \$ (plus 9,10 \$ de TPS) par année au Canada, 156 \$ US aux États-Unis et 182 \$ US dans les autres pays.

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

- tabs to each section -- so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

1994 Statistics Canada Catalogue

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et

conseils sur l'obtention d'aide d'experts pour les produits électroniques et les recherches en direct;

- système d'onglets pour chaque section - pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

...maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

For and About Businesses Serving the Business of Canada...

At last, current data and expert analysis on this VITAL sector in one publication!

The services sector now dominates the industrial economies of the world. Telecommunications, banking, advertising, computers, real estate, engineering and insurance represent an eclectic range of services on which all other economic sectors rely.

Despite their critical economic role, however, it has been hard to find out what's happening in these industries. Extensive and time-consuming efforts have, at best, provided a collection of diverse bits and pieces of information ... an incomplete basis for informed understanding and effective action.

Now, instead of this fragmented picture, **Services Indicators** brings you a cohesive whole. An innovative quarterly from Statistics Canada, this publication **breaks new ground**, providing timely updates on performance and developments in:

- Communications
- Finance, Insurance and Real Estate
- Business Services

Services Indicators brings together analytical tables, charts, graphs and commentary in a stimulating and inviting format. From a wide range of key financial indicators including profits, equity, revenues, assets and liabilities, to trends and analysis of employment, salaries and output – PLUS a probing feature article in every issue, **Services Indicators** gives you the complete picture **for the first time!**

Finally, anyone with a vested interest in the services economy can go to **Services Indicators** for **current** information on these industries ... both at-a-glance and in more detail than has ever been available before – all in one unique publication.

If **your** business is serving business in Canada, or if you are involved in financing, supplying, assessing or actually using these services, **Services Indicators** is a turning point – an opportunity to forge into the future armed with the most current insights and knowledge.

Order YOUR subscription to **Services Indicators** today!

Services Indicators (catalogue no. 63-0160XPB) is \$112 (plus 7% GST) in Canada, US\$135 in the United States and US\$157 in other countries.

To order, write to Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario K1A 0T6 or contact the nearest Statistics Canada Regional Reference Centre listed in this publication.

If more convenient, fax your order to 1-613-951-1584 or call 1-800-267-6677 toll-free in Canada and the United States [1-613-951-7277 elsewhere] and charge to your VISA or MasterCard.

Au sujet des entreprises au service des affaires du Canada et à leur intention...

Enfin regroupées en une publication, des données courantes et des analyses éclairées sur ce secteur **ESSENTIEL!**

Le secteur des services domine à l'heure actuelle les économies industrielles du monde. Les télécommunications, les opérations bancaires, la publicité, l'informatique, l'immobilier, le génie et l'assurance représentent une gamme éclectique de services sur lesquels reposent tous les autres secteurs économiques.

En dépit de leur rôle critique sur le plan économique, il est toutefois difficile de savoir ce qui se passe dans ces branches d'activité. Des efforts considérables et fastidieux ont permis, au mieux, de rassembler une collection de renseignements fragmentaires divers... qui ne favorisent pas la compréhension avisée et la prise de mesures efficaces.

Remplacez **maintenant** ce tableau fragmentaire par l'image cohérente que vous offre **Indicateurs des services**. Cette publication trimestrielle innovatrice de Statistique Canada **pénètre dans un domaine inexploré**, fournissant des aperçus opportuns du rendement et des progrès dans les domaines suivants :

- Communications
- Finance, assurance et immobilier
- Services aux entreprises

Indicateurs des services rassemble des tableaux analytiques, des diagrammes, des graphiques et des observations en un mode de présentation stimulant et attrayant. En puisant à même une vaste gamme d'indicateurs financiers importants, allant notamment des profits, des capitaux propres, des recettes, de l'actif et du passif aux tendances et analyses de l'emploi, des salaires et de l'extrant – à laquelle s'ajoute un article de fond exploratif dans chaque numéro, **Indicateurs des services** brosse **pour la première fois** un tableau complet!

Enfin, quiconque s'intéresse au secteur des services peut consulter **Indicateurs des services** pour trouver des renseignements **courants** sur ces branches d'activité... tant sous une **forme sommaire** qu'**à un niveau de détail n'ayant jamais encore été offert** – et ce, dans une même publication.

Si vous êtes de ceux qui fournissent des services aux entreprises canadiennes, ou si vous financez, fournissez ou évaluez ces services ou y avez en fait recours, **Indicateurs des services** représente un tournant – une chance de s'aventurer dans l'avenir en étant armé des réflexions et connaissances les plus actuelles.

Commandez dès aujourd'hui VOTRE abonnement à **Indicateurs des services!**

Indicateurs des services (n° 63-0160XPB au catalogue) coûte 112 \$ (plus 7 % de TPS) au Canada, 135 \$ US aux États-Unis et 157 \$ US dans les autres pays.

Pour commander, écrivez à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6, ou communiquez avec le Centre régional de consultation de Statistique Canada le plus près (voir la liste qui figure dans la présente publication).

Si vous préférez, vous pouvez télécopier votre commande en composant le 1-613-951-1584 ou téléphoner sans frais du Canada et des États-Unis au 1-800-267-6677 [ou d'ailleurs, au 1-613-951-7277] et porter les frais à votre compte VISA ou MasterCard.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

Note of Appreciation

Canada owes the success of its statistical system to a long-standing cooperation involving Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

Note de reconnaissance

Le succès du système statistique du Canada repose sur un partenariat bien établi entre Statistique Canada et la population, les entreprises, les administrations canadiennes et les autres organismes. Sans cette collaboration et cette bonne volonté, il serait impossible de produire des statistiques précises et actuelles.

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences - Permanence of Paper for Printed Library Materials, ANSI Z39.48 - 1984.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

HIGHLIGHTS

Industrial Product Price Index

High foreign demand for exports and exchange rate movements saw the 12-month November increase jump to 7.2%, the highest level since 1982. Signs of potential pressure on consumer prices remain quiet.

This was the sixth straight month the 12-month level had increased over 6%. According to preliminary figures prices rose 0.8% from their October level.

November's increases were fueled by exported input goods, particularly non-ferrous metal, wood products, newsprint and pulp. The 12-month change in intermediate goods (used to produce other goods) reached 10.3% overall. The decline in value of the Canadian dollar against the U.S. dollar accounted for about one-sixth of the November month-to-month increase.

This was the fourth time that the 12-month change in prices at the manufacturer level was about a percentage point higher than at the consumer level. At the manufacturer level, November's 12-month price increase for domestic consumer goods was a little over 2%. The 12-month change in the good's component of the CPI was about 1%, excluding the effect of the drop in tobacco taxes.

Faced with a relatively weak retail market, it would seem that distributors and retailers are absorbing part of the increase in manufacturer prices while trying to hold down labour and other costs. Usually, about half of the consumer's dollar goes to manufacturers.

The 12-month change in Canadian industrial prices remained much higher than in the other G7 industrialized nations. It was more than six percentage points higher than in the United States and more than four percentage points higher than in Germany, United Kingdom and France. The structure of the Canadian economy and international exchange rate movements continued to be important contributors to the difference in price changes.

FAITS SAILLANTS

Indice des prix des produits industriels

La forte demande étrangère pour les exportations et les mouvements des taux de change ont provoqué une hausse de 7,2% au cours des douze derniers mois en novembre, la plus forte hausse depuis 1982. Les signes d'une éventuelle pression sur les prix à la consommation demeurent atténués.

Il s'agit du sixième mois consécutif où la hausse annuelle a été supérieure à 6%. Selon les chiffres provisoires les prix ont augmenté de 0,8% par rapport à octobre.

Les augmentations observées en novembre sont attribuables aux exportations de produits semi-finis, particulièrement les métaux non ferreux, les produits du bois, le papier journal et la pâte de bois. La variation au cours des douze derniers mois pour les biens semi-finis (qui servent à produire d'autres biens) a atteint 10,3% dans l'ensemble. La dépréciation du dollar canadien par rapport au dollar américain observée en novembre est responsable pour environ un sixième de la hausse d'un mois à l'autre.

Pour la quatrième fois, la variation au cours des douze derniers mois des prix des fabricants dépasse d'environ un point celle des prix à la consommation. Au niveau du fabricant, la hausse mensuelle observée en novembre pour les biens de consommation au Canada était d'un peu plus de 2%. La variation au cours des douze derniers mois de la composante des biens de l'IPC était d'environ 1%, si on exclut les effets de la baisse de la taxe sur le tabac.

Dans le contexte d'un marché de détail relativement faible, il semble que les intervenants et les détaillants absorbent une partie de la hausse de prix des fabricants, tout en essayant de freiner l'augmentation des coûts de la main-d'oeuvre et des autres coûts. Habituellement, environ la moitié du dollar de consommation va aux fabricants.

La variation au cours des douze derniers mois des prix des produits industriels est demeurée beaucoup plus élevée au Canada que dans les autres pays industrialisés du Groupe des Sept. Le taux était plus de six points de pourcentage plus élevé que celui des États-Unis, et plus de quatre points plus élevé que celui de l'Allemagne, du Royaume-Uni et de la France. La structure de l'économie canadienne et l'incidence des fluctuations des taux de change internationaux ont joué un rôle important au niveau des variations.

Export-oriented products (non-ferrous metals, lumber and timber, newsprint and pulp) led the price increases, which were mainly driven by world market conditions. Domestic construction supported the increase in wood product prices. Other important contributors were petroleum products and exported motor vehicles. Exchange rate movements accounted almost completely for the latter. The only important decline was in pork and poultry.

Overall, conditions remained good for Canadian producers while Canadian consumers did not see any strong increases in prices. The ongoing world recovery, strong orders for investment goods, and the continuing absence of a strong and sustained growth in retail sales suggest this pattern may continue.

Les produits d'exportations (métaux non ferreux, sciages et bois d'oeuvre, papier journal et pâte de bois) sont à l'origine de la progression qui découle principalement des conditions des marchés mondiaux. La construction au Canada a contribué à maintenir l'augmentation des prix des produits du bois. Parmi les autres importants facteurs d'entraînement, mentionnons les produits du pétrole et les exportations de véhicules automobiles. Les fluctuations des taux de change expliquent presque entièrement ce dernier mouvement. La seule baisse importante a été observée au titre du porc et de la volaille.

Dans l'ensemble, les conditions sont demeurées favorables pour les producteurs canadiens. Les consommateurs canadiens n'ont pas subi de fortes hausses de prix. Cette tendance pourrait se poursuivre si on en juge par la reprise mondiale actuelle, la vigueur de la demande de biens d'équipement, et l'absence continue d'une croissance forte et soutenue des ventes au détail.

HIGHLIGHTS

Raw Materials Price Index

Manufacturers paid 13.2% more for raw materials than in November 1993, the highest 12-month increase in four years. Based on preliminary data prices rose 2.2% from their October 1994 level.

The monthly increase abruptly ends a three-month period in which prices of raw materials had begun to level off, helping some manufacturers hold their costs down.

Higher prices for non-ferrous metals, crude oil, wood and vegetable products were responsible for November increases. They were partially offset by lower prices for live hogs and cattle.

The 12-month increase hasn't been as high since December 1990 when the raw materials price index rose 14.3%.

Non-ferrous metal prices have increased almost monthly since November 1993, rising more than 50% over the 12-month period. Higher prices for copper, aluminum, bismuth and antimony led the increases. Recently, all metals have been subject to varying degrees of market speculation. However, increased industrial activity in the G7 countries combined with the restocking of metal inventories has had a strong influence on the surge of metal prices.

Crude oil prices have increased almost 5% in the latest two months, and 16% since November 1993. The November decision by OPEC to freeze output in 1995 will add to the pressure for higher prices if world demand increases. Also, the new U.S. environment crude oil shipping liability insurance system has had an upward impact on crude oil prices. Factors such as the weather, Canadian-U.S. exchange rate changes and non-OPEC production will also affect future crude oil prices.

FAITS SAILLANTS

Indice des prix des matières brutes

Les fabricants ont payé 13,2% de plus pour les matières brutes qu'en novembre 1993. C'est la plus forte augmentation sur 12 mois depuis quatre ans. D'après les chiffres préliminaires, cependant, il y a eu une hausse de 2,2% des prix par rapport au niveau affiché en octobre.

L'augmentation mensuelle met brusquement fin à la stabilisation des prix des matières brutes observée durant les trois derniers mois, ce qui avait permis à certains fabricants de maintenir leurs coûts à un niveau plus bas.

L'accroissement important des prix des métaux non ferreux, du pétrole brut, du bois et des substances végétales, a été responsable des augmentations en novembre. Les hausses de prix ont été compensées quelque peu par la baisse des prix du porc et du bétail vivants.

L'augmentation sur 12 mois n'a pas été aussi élevée depuis décembre 1990 alors que l'indice des prix des matières brutes avait augmenté de 14,3%.

Les prix des métaux non ferreux ont augmenté presque tous les mois depuis novembre 1993. La progression des prix était supérieure à 50% sur la période de 12 mois. Les augmentations étaient dominées par les hausses des prix du cuivre, de l'aluminium, du bismuth et de l'antimoine. Récemment, tous les métaux ont fait l'objet de spéculation à des degrés divers. Toutefois, l'effet combiné de l'accroissement de l'activité industrielle des pays du G7 et du restockage des métaux a exercé une forte incidence sur la montée des prix des métaux.

Les prix du pétrole brut ont progressé de presque 5% pendant les deux derniers mois. Depuis novembre 1993, les prix du pétrole brut sont en hausse de 16%. La décision de l'OPEP en novembre de bloquer la production en 1995 s'ajoutera aux pressions exercées pour l'accroissement des prix si la demande mondiale augmente. En outre, l'adoption par les États-Unis d'un nouveau régime d'assurance-responsabilité touchant le transport du pétrole brut a entraîné une hausse des prix du pétrole brut. Des facteurs tels que les conditions météorologiques, les fluctuations du taux de change avec les États-Unis, et la production des pays hors OPEP, auront aussi une incidence sur les futurs prix du pétrole brut.

Wood prices that increased 33% in 1993 have been edging up almost monthly in 1994. Prices were up 12% this November compared to a year earlier. The apparent strong demand for wood, cutting controls that affect supply, and higher stumpage fees are keeping prices at historical highs. A decision by the Ontario natural resources ministry to allow poplar and birch to be cut on Crown lands in Northern Ontario will add to the supply of wood chips. One major use of wood chips is to manufacture oriented strand board, a strong plywood substitute.

Prices for vegetable products were on an upward trend from the end of 1992 until June 1994. Prices fluctuated slightly afterwards, reaching a level in November which was marginally below June. Higher November prices for sugar, canola, raw tobacco, barley and wheat offset lower prices for corn and oats. Canola prices reached their peak in June. November canola prices increased 8% but were still almost 20% below June prices.

Live hog prices which fell for the third successive month have declined almost 30% since August. The large herd size and the unwillingness of producers to carry their stock over the winter are depressing prices.

Après la hausse de 33% affichée en 1993, les prix du bois ont progressé presque tous les mois en 1994. En novembre 1994, les prix étaient de 12% supérieurs à ceux de l'année dernière. La forte demande apparente pour le bois, les contrôles d'abattage qui influent sur l'approvisionnement, ainsi que la hausse des droits de coupe, contribuent à maintenir les prix à des niveaux inégaux. La décision prise par le ministère des Richesses naturelles de l'Ontario en vue d'autoriser l'abattage des peupliers et des bouleaux sur les terrains de la Couronne situés dans le nord de l'Ontario augmentera les réserves de copeaux de bois. Les copeaux de bois sont utilisés dans la fabrication de panneaux à copeaux orientés, un substitut solide du contreplaqué.

Les prix des substances végétales ont suivi une tendance à la hausse depuis la fin de 1992 jusqu'à la juin 1994. Les prix ont légèrement fluctué par la suite pour atteindre en novembre un niveau légèrement inférieur à celui enregistré en juin. En novembre, les hausses des prix du sucre, du canola, du tabac brut, de l'orge et du blé ont compensé les baisses des prix du maïs et de l'avoine. Les prix du canola ont culminé en juin. En novembre, les prix du canola ont augmenté de 8% mais étaient quand même inférieurs de 20% à ceux de juin.

Les prix des porcs vivants, qui ont fléchi pour le troisième mois consécutif, ont diminué de près de 30% depuis août. Les prix continuent de se replier en raison de l'importance des troupeaux disponibles et du fait que les producteurs soient peu enclin à garder leurs stocks pendant l'hiver.

Non-ferrous Metals - Métaux non ferreux	140.6	130.8	90.9	7.5	54.7	1.05	5.94	13.2
Non-metallic Minerals - Minéraux non métalliques	101.5	101.5	99.3	0.0	2.2	0.00	0.05	2.6
Mineral fuels - Combustibles minéraux	105.0	101.9	91.9	3.0	14.3	0.78	3.77	31.7

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) This shows the amount by which the movement of each index would move the total in the absence of any change in the other indexes.

(1) Ce chiffre donne l'ampleur de la variation qu'occasionnerait dans l'indice d'ensemble un mouvement d'un indice donné si tous les autres indices demeuraient inchangés.

(2) These indexes are preliminary.

(2) Ces indices sont provisoires.

	Wood - Bois	207.7	204.9	1.4	1.5	11.7
	Ferrous material - Matières ferreuses	120.0	119.4	0.5	-2.3	5.0
	Non-ferrous metals - Métaux non ferreux	140.6	130.8	7.5	13.4	54.7
	Non metallic minerals - Minéraux non métalliques	101.5	101.5	0.0	0.6	2.2
	Mineral fuels - Combustibles minéraux	105.0	101.9	3.0	-3.9	14.3

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

TABLE 2. Industrial Product Price Indexes, by Commodity and Commodity Aggregations

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate.

For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling.

The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.

(2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.

(2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

Reference Document

See reference document in IPPI. Document contains the weighting pattern of the Raw Materials Price Indexes.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

Document de référence

Voir le document de référence de l'IPPI, qui contient le schéma de pondération des indices de prix des matières brutes.

**ELECTRIC POWER SELLING PRICE
INDEXES (NON-RESIDENTIAL),
1986 = 100**

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

**INDICES DES PRIX DE VENTE DE L'ÉNERGIE
ÉLECTRIQUE (NON RÉSIDENTIELLE),
1986 = 100**

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialties. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistic Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries. Highlights of the *Canadian Composite Leading Indicator* (catalogue no. 11F0008XFE) are available by fax – the same day of release – for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique annuel à titre gracieux**.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'*Indicateur composite avancé* (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Hire our team of researchers for \$56 a year

Notre équipe de chercheurs est à votre service pour 56 \$ par année

Subscribing to *Perspectives on Labour and Income* is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But *Perspectives* is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive *The Labour Market Review*, giving you timely analysis on labour market performance over the previous six months or year.

And all for only \$56!

Thousands of Canadian professionals turn to *Perspectives* to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find *Perspectives* indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to *Perspectives* today (Cat. No. 75-0010XPE).

ORDER NOW!

For only \$56 (plus \$3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$68 for U.S. customers and US\$80 for customers in other countries.

Fax your VISA or MasterCard order to: (613) 951-1584.

Call toll free: 1-800-267-6677. Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

S'abonner à *L'emploi et le revenu en perspective*, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les

tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le *Bilan du marché du travail* deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

Tout cela pour 56 \$ seulement!

Des milliers de professionnels au Canada consultent *Perspective* pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que *L'emploi et le revenu en perspective* deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à *Perspective* (n° 75-0010XPF au cat.) dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 \$ seulement (TPS de 3,92 \$ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 \$ US aux États-Unis et de 80 \$ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au (613) 951-1584, par téléphone (sans frais) au 1-800-267-6677, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication).

Pick a topic... any topic

The **1994 Statistics Canada Catalogue** is your guide to the most complete collection of facts and figures on Canada's changing business, social and economic environment. No matter what you need to know, the **Catalogue** will point you in the right direction.

From the most popular topics of the day – like employment, income, trade, and education – to specific research studies – like mineral products shipped from Canadian ports and criminal victimization in urban areas – you'll find it all here.

... the 1994 Statistics Canada Catalogue will help you get your bearings...

The **Catalogue** puts all this information at your fingertips. With the expanded index, you can search by subject, author or title – even periodical articles are indexed. There's also a separate index for all our electronic products.

The **Catalogue** has everything you need to access all Statistics Canada's products:

- descriptions of over 25 new titles, plus succinct abstracts of the over 650 titles and 7 map series already produced;
- a complete guide to finding and using statistics;
- electronic products in a variety of media, and

advice on getting expert assistance on electronic products and on-line searches;

- tabs to each section – so you can immediately flip to the information you need.

... time and time again

To make sure that the **Catalogue** stands up to frequent use, we used a specially coated cover to prevent broken spines, tattered edges and dog-eared corners.

Order today – you'll be lost without it.

Choisissez un sujet... n'importe lequel

Le **Catalogue de Statistique Canada 1994** est votre guide pour la collection la plus complète de faits et de chiffres dans les domaines, en constante évolution, du commerce, de la société et de l'économie du Canada. Peu importe ce que vous voulez savoir, le **Catalogue** vous mettra sur la bonne piste.

Des sujets actuels les plus populaires – comme l'emploi, le revenu, le commerce et l'éducation – à des études de recherche spécialisées – comme les produits minéraux expédiés des ports canadiens et la victimisation dans les régions urbaines – vous trouverez tout dans ce document.

Le Catalogue de Statistique Canada 1994 vous aidera à vous orienter...

Le **Catalogue** vous met tous ces renseignements sous la main. L'index augmenté vous permet de chercher par sujet, auteur ou titre – les articles de périodiques sont même indexés. On a aussi ajouté un index séparé pour tous nos produits électroniques.

Le **Catalogue** a tout ce qu'il vous faut pour vous procurer les produits de Statistique Canada :

- descriptions de plus de 25 nouveaux titres et courts résumés des 650 titres et plus et des 7 séries de cartes déjà disponibles;
- guide complet pour obtenir et utiliser les données statistiques;
- produits électroniques sur supports divers et

conseils sur l'obtention d'aide d'experts pour les produits électroniques et les recherches en direct;

- système d'onglets pour chaque section – pour que vous puissiez immédiatement repérer les renseignements qui vous intéressent.

... maintes et maintes fois

Pour garantir que le **Catalogue** puisse résister à une utilisation fréquente, nous avons utilisé une couverture avec un revêtement spécial conçue pour éviter les dos cassés, les bords abîmés et les coins de page pliés.

Commandez aujourd'hui – vous ne pourrez plus vous en passer.

Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered. Data are available on CD, diskette, computer print-out, microfiche and microfilm, and magnetic tape. Maps and other geographic reference materials are available for some types of data. Direct online access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable database and retrieval system.

How to Obtain More Information

Inquiries about this publication and the listed documents should be directed to:

Goods and Services Producing Industries Section,
Prices Division,

Statistics Canada, Ottawa, K1A 0T6 Telephone:

Standards of Service to the Public

To maintain quality service to the public, Statistics Canada follows established standards covering statistical products and services, delivery of statistical information, cost-recovered services and service to respondents. To obtain a copy of these service standards, please contact your nearest Statistics Canada Regional Reference Centre.

Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous formes diverses. Outre les publications, des totalisations habituelles et spéciales sont offertes. Les données sont disponibles sur disque compact, disquette, imprimé d'ordinateur, microfiche et microfilm, et bande magnétique. Des cartes et d'autres documents de référence géographiques sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordinolinguée et le système d'extraction de Statistique Canada.

Comment obtenir d'autres renseignements

Toute demande de renseignements au sujet de cette publication ou de statistiques et services connexes doit être adressée à la:

Section des industries de biens et de services,
Division des prix,

Statistique Canada, Ottawa, K1A 0T6 téléphone: (1-613-951-3350) ou au centre de consultation de Statistique Canada à:

Note of Appreciation

*Canada owes the success of its statistical system to
a long-standing cooperation involving Statistics
Canada, the citizens of Canada, its businesses,
governments and other institutions. Accurate and
timely statistical information could not be produced
without their continued cooperation and goodwill.*

Note de reconnaissance

*Le succès du système statistique du Canada repose
sur un partenariat bien établi entre Statistique Canada
et la population, les entreprises, les administrations
canadiennes et les autres organismes. Sans cette
collaboration et cette bonne volonté, il serait impossible
de produire des statistiques précises et actuelles.*

Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- ^P preliminary figures.
- ^r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

NOTE ON CANSIM

CANSIM® (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. Most of the data appearing in this publication, as well as many other data series are available from CANSIM via terminal, on computer printouts, or in machine readable form. Historical and more timely data, not included in this publication, are available from CANSIM.

For further information write to Marketing Division, Statistics Canada, Ottawa, K1A 0T6 or call (613) 951-8200.

® Registered Trade Mark of Statistics Canada.

Revision

Unless otherwise stated, price indexes in this publication are subject to revision for the most recent six months shown. Any revisions beyond these limits are so indicated.

The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences – Permanence of Paper for Printed Library Materials, ANSI Z39.48 – 1984.

Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres non disponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- ^P nombres provisoires.
- ^r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

NOTE CONCERNANT CANSIM

Le CANSIM® (Système canadien d'information socio-économique) est le système de Statistique Canada qui se compose d'une banque de données informatisées et de son logiciel de soutien. La plupart des données présentées dans cette publication et beaucoup d'autres données contenues dans le CANSIM peuvent être extraites par l'intermédiaire d'un terminal, sous forme d'imprimés d'ordinateur ou sous forme lisible par machine. Des données historiques et des données plus actuelles qui n'apparaissent pas dans cette publication sont disponibles de CANSIM.

Pour plus de renseignements, écrivez à la Division du marketing, Statistique Canada, Ottawa, K1A 0T6 ou téléphonez à (613) 951-8200.

HIGHLIGHTS

Industrial Product Price Index

1994 ANNUAL AND DECEMBER 1994

In 1994, strong foreign demand strengthened the economic position of Canadian manufacturers and resulted in higher industrial prices. Canadian consumers, however, were little affected by these increases.

The annual increase in industrial prices in 1994 jumped to 5.7% from 3.3% in 1993. It was the highest annual change since the end of the inflationary period caused by the second oil crisis in 1982. Even so, the annual change in consumer goods prices, excluding the effect of the change in taxation on tobacco products, was only 1.2% in 1994.

Chart

Percentage Change in the Industrial Product Price Index, All Commodities, From the Same Month of the Previous Year, 1981-1994, 1986=100

Export-oriented commodities dominated price changes in 1994: pulp (+29.5%), non-ferrous metal products (+25.2%), lumber, sawmill and other wood products (+11.6%), and motor vehicles (+6.6%). In 1993, in most of these industries, prices were generally depressed and/or there was considerable unused capacity. Strong and rising international demand for these products lead both to price and output increases. This strengthened profits in these industries. At the same time, much of the output was exported which greatly reduced the shock to the Canadian economy of the price increases in these sectors. This helped shield consumers.

FAITS SAILLANTS

Indice des prix des produits industriels

ANNUEL ET DÉCEMBRE 1994

En 1994, la forte demande étrangère a raffermi la position économique des fabricants canadiens et provoqué une hausse des prix industriels. Les consommateurs canadiens ont toutefois été peu touchés par ces augmentations.

La progression annuelle des prix industriels s'est fixée à 5,7% en 1994, comparativement à 3,3% en 1993. Il s'agit de la plus forte variation annuelle depuis 1982, au moment où prenait fin la période inflationniste provoquée par la deuxième crise du pétrole. Toutefois, le changement annuel des prix des biens de consommation, si on exclut l'incidence de la modification de la taxe sur les produits du tabac, s'établissait à 1,2% en 1994.

Graphique

Taux de variation de l'indice des prix des produits industriels, tous les produits, par rapport au mois correspondant de l'année précédente, 1981-1994, 1986=100

Les produits d'exportation viennent en tête au chapitre des variations de prix en 1994: la pâte de bois (+29,5%), des produits métalliques non ferreux (+25,2%), du bois d'oeuvre, des sciages et des autres produits du bois (+11,6%) et des véhicules automobiles (+6,6%). En 1993, dans la plupart de ces secteurs d'activité, les prix étaient généralement en baisse et/ou la capacité non utilisée atteignait des niveaux considérables. La forte demande internationale pour ces produits, qui prenait encore plus d'ampleur, a provoqué à la fois une hausse des prix et de la production, d'où la vigueur des profits dans ces secteurs d'activité. Parallèlement, le fait d'exporter la majeure partie de la production a considérablement réduit l'impact sur l'économie canadienne des augmentations de prix dans ces secteurs. Cela a permis de protéger les consommateurs.

Because many export prices are quoted in US dollars, exchange rate movements played an important role in the fluctuations of industrial prices in 1994. Occasionally, as in April, exchange rate movements accounted for most of the monthly change. From February to August, the 12-month change in the exchange rate added between 1 and 2 points to the 12-month change in the IPPI. During the rest of the year, it added under 1 point.

Overall, conditions remained good for Canadian producers while consumers in December did not see any strong price increases. Current conditions (the ongoing world economic recovery, high levels of unfilled orders for investment goods, and uncertain domestic consumer demand) suggest this pattern may continue. However, upward pressures on prices in the manufacturing sector of the economy are widespread. Higher input costs are expected to lead to price increases for various types of machinery and equipment in January.

December's 12-month change in industrial prices jumped to 7.7% as prices rose by 0.8% from November levels. This 12-month change was the highest increase since early 1982. In December, the most important price increases continued to come from exported goods (particularly non-ferrous metal products, automobiles, and newsprint). The 12-month price change in processed raw material products (such as pulp and non-ferrous metal products) reached almost 30%. The effects of exchange rate movements on prices denominated in US dollars accounted for about four-tenths of the month-to-month change in prices and about one-tenth of the 12-month change.

The 12-month change in prices at the manufacturer level remained about a percentage point higher than at the consumer level. At the manufacturer level, December's 12-month price increase for domestic consumer goods was about 2.5%. The 12-month change in the goods' component of the CPI (excluding the effect of the drop in tobacco taxes) was about 1.3%. Usually, about half of the consumer's dollar goes to manufacturers, the rest goes to wholesalers, retailers, transportation, and governments. It would seem that intermediaries and retailers are absorbing part of the increase in manufacturers' prices while trying to hold down labour and other costs as they wait for the domestic consumer market to strengthen.

Étant donné que de nombreux prix à l'exportation sont exprimés en dollars américains, les variations du taux de change ont joué un rôle important au plan des fluctuations des prix industriels en 1994. De temps en temps, comme au mois d'avril, la variation mensuelle était en majeure partie attribuable aux variations du taux de change. De février à août, la variation au cours des douze derniers mois du taux de change a fait grimper d'un ou deux points la variation au cours des douze derniers mois de l'IPPC. Pendant le reste de l'année, sa contribution était inférieure à un point.

Dans l'ensemble, les conditions sont demeurées favorables pour les producteurs canadiens et les consommateurs canadiens n'ont pas subi de fortes hausses de prix en décembre. Cette tendance pourrait se poursuivre si on en juge par les conditions actuelles (reprise mondiale soutenue, niveaux élevés de commandes en carnet au titre des biens d'équipement et incertitude de la demande des consommateurs canadiens). Toutefois, les pressions à la hausse des prix sont généralisées dans le secteur manufacturier. On prévoit que la majoration des coûts des intrants provoquera des augmentations de prix des divers types de machines et de matériel en janvier.

La variation au cours des douze derniers mois des prix industriels observée en décembre s'est accrue pour se fixer à 7,7%, les prix ayant progressé de 0,8% par rapport au niveau atteint en novembre. Cette variation au cours des douze derniers mois se trouve à être la plus forte hausse depuis le début de 1982. En décembre, les produits exportés, en particulier les produits métalliques non ferreux, les automobiles et le papier journal ont continué d'exercer les plus fortes pressions à la hausse. La variation au cours des douze derniers mois des matières premières travaillées (par ex. la pâte de bois et les produits métalliques non ferreux) a presque atteint 30%. Environ quatre dixièmes de la variation mensuelle des prix et environ un dixième de la variation au cours des douze derniers mois sont attribuables aux conséquences des fluctuations du taux de change sur les prix libellés en monnaie américaine.

La variation au cours des douze derniers mois au niveau du fabricant dépasse encore d'environ un point celle des prix à la consommation. Au niveau du fabricant, la progression des biens de consommation canadiens au cours des douze derniers mois était d'environ 2,5%. La variation au cours des douze derniers mois de la composante des biens de l'IPC était d'environ 1,3%, si on exclut l'incidence de la baisse de la taxe sur le tabac. D'ordinaire, environ la moitié du dollar de consommation va aux fabricants et le reste, aux grossistes, détaillants, transporteurs et gouvernements. Il semble que les intervenants et les détaillants absorbent une partie de la hausse de prix des fabricants et essaient de freiner l'augmentation des coûts de main-d'oeuvre et des autres coûts, tout en attendant que le marché intérieur de la consommation se raffermisse.

Highlights

Raw materials price index

1994 ANNUAL AND DECEMBER 1994

Manufacturers paid 7.5% more for raw materials in 1994 than in 1993, the highest yearly increase since 1982. Most of the jump came from metals, vegetable products and wood.

Raw material prices in December rose 0.5% from November, and were 15.3% higher than a year earlier.

Prices for raw materials have increased substantially over the past two years. The 7.5% jump in 1994 followed a 5.9% increase in 1993.

Price increases during 1994 were moderated by mineral fuels, which rose less than 1%, and by prices for live hogs and cattle which declined by almost 5%. Excluding mineral fuels, the 1994 increase for raw material prices would have been 10%.

As the world economic recovery continued, non-ferrous metal prices rose 27% in 1994 compared with 1993. Higher prices for copper, aluminum materials, nickel and other metals such as bismuth, and antimony led the increases.

Chart

The Non-ferrous Metals Price Index, 1986=100

Copper prices escalating by more than 30% and aluminum materials by more than 40% in 1994 were the major contributors in the non-ferrous metals' group. After increasing 12% in 1993,

Faits Saillants

Indice des prix des matières brutes

ANNUEL ET DÉCEMBRE 1994

Les fabricants ont payé 7,5% de plus pour les matières brutes en 1994 qu'en 1993. C'est la plus forte augmentation annuelle depuis 1982, et elle s'explique principalement par la hausse du prix des métaux, des produits d'origine végétale et du bois.

Le prix des matières brutes augmente de 0,5% entre novembre et décembre, et il dépasse de 15,3% son niveau d'un an plus tôt.

Le prix des matières brutes a augmenté de façon appréciable au cours des deux dernières années. Il a progressé en effet de 7,5% en 1994 et de 5,9% en 1993.

La progression des prix en 1994 est freinée par les combustibles minéraux, dont le prix s'accroît de moins de 1%, et par celui des porcs vivants et du bétail, qui baisse de presque 5%. Si l'on exclut les combustibles minéraux, la hausse de prix des matières brutes en 1994 aurait été de 10%.

Avec la poursuite de la reprise économique dans le monde, les prix des métaux non ferreux augmentent en 1994 de 27% par rapport à 1993. Cette augmentation est dominée par le cuivre, les matières en aluminium, le nickel et d'autres métaux, comme le bismuth et l'antimoine.

Graphique

L'indice des métaux non ferreux, 1986=100

En 1994, les prix du cuivre augmentent de plus de 30%, et celui des matériaux en aluminium, de plus de 40%. Cela constitue la principale cause de la hausse du groupe des métaux non ferreux. Après une majoration de 12% en 1993,

ferrous material prices moved up another 14% in 1994. Higher prices for iron and steel scrap (+22%) along with slightly greater prices for iron ore (+6%) were responsible for the year-to-year increase.

Vegetable product prices increased almost 20% in 1994 compared to 1993. Higher prices for coffee, grains, oilseeds, rubber and sugar were primarily responsible. Coffee prices rose significantly due to the supply shortage caused by poor weather in Brazil. Grain prices, particularly for wheat (because of strong export demand) increased more than 17% in 1994. Oilseed prices—mainly canola, for which exports have almost doubled on an annual basis, moved up more than 27% in 1994.

After rising 33% in 1993, wood prices continued to increase in 1994 (+10%). In 1993, wood prices were driven by higher prices for logs; in 1994, wood prices were also subject to increased pulpwood prices. Escalating prices for pulp and paper worldwide have caused Canada's pulpwood prices to increase almost 14% in the latest six months. This increase is also reflected in prices at the industrial product level where pulpwood is made into pulp. Pulp prices increased almost 30% from 1993 to 1994.

Crude oil prices hardly changed from 1993. While they increased substantially over the first seven months of 1994, they declined overall in the last five months of the year. Contributing factors behind the recent decline in crude oil prices are the mild winter and higher-than-forecast non-OPEC production.

Prices for live hogs and cattle declined almost 5% in 1994 compared with 1993. Large herds of hogs and producers unwilling to carry their stock over the winter have depressed prices. Also affecting the industry, has been a restructuring where huge-scale, predominantly integrated units have overtaken many small production units.

In December, manufacturers paid 15.3% more for raw materials than in December 1993. This marked the second consecutive month when the 12-month increase was the highest in four years. Prices rose 0.5% from their November level. Higher monthly prices in December for copper, nickel, wood, hogs and cattle, sugar, canola and rubber were greatly offset by the decline in crude oil prices and were offset less by lower coffee prices.

les prix des métaux ferreux s'accroissent de 14% en 1994. La hausse d'une année sur l'autre est attribuable à la progression des prix des déchets de fer et d'acier (+22%) et à une légère hausse (+6%) du prix du minerai de fer.

Les prix des produits d'origine végétale augmentent de presque 20% en 1994 par rapport à 1993, en raison principalement de la majoration des prix du café, des céréales, des oléagineux, du caoutchouc et du sucre. L'augmentation appréciable du prix du café est imputable à la réduction des approvisionnements causée par le mauvais temps au Brésil. Les prix des céréales, en particulier du blé, qui a fait l'objet d'une forte demande à l'exportation, s'accroissent de plus de 17% en 1994. Les prix des oléagineux—principalement du canola, dont les exportations ont presque doublé sur base annuelle, augmentent de plus de 27% en 1994.

Après une hausse de 33% en 1993, le prix du bois continue d'augmenter en 1994 (+10%). En 1993, la hausse des prix du bois est alimentée par les billes; en 1994, on constate en plus une majoration des prix du bois à pâte. La croissance des prix des pâtes et papiers dans le monde s'est traduite par une augmentation de presque 14% du cours du bois à pâte canadien au cours des six derniers mois. Cette augmentation se retrouve aussi au niveau des produits industriels, lorsque le bois est transformé en pâte. Le prix de la pâte de bois a augmenté de presque 30% de 1993 à 1994.

Le prix du pétrole brut est resté presque inchangé par rapport à 1993. Alors qu'il augmente de façon appréciable au cours des sept premiers mois de 1994, il diminue au total au cours des cinq derniers. Un hiver doux et le dépassement des prévisions pour la production hors OPEP expliquent la diminution récente du prix du pétrole brut.

Les prix des porcs vivants et du bétail baissent de presque 5% par rapport à 1993. Les troupeaux importants de porcs et le refus des producteurs de reporter leurs stocks en hiver ont déprimé les prix. Ce secteur d'activité est également touché, par une restructuration au cours de laquelle des établissements de grande taille, dans l'ensemble intégrés, ont absorbé un grand nombre d'unités de production plus petites.

En décembre, les fabricants ont payé 15,3% de plus pour les matières brutes qu'en décembre 1993. C'est le deuxième mois d'affilée au cours duquel la hausse sur douze mois est la plus élevée en quatre ans. Par rapport à novembre, les prix s'accroissent de 0,5%. La hausse des prix mensuels du cuivre, du nickel, du bois, des porcs et du bétail, du sucre, du canola et du caoutchouc est compensée dans une large mesure par la baisse de celui du pétrole brut et, de façon moindre, par celle du prix du café.

TEXT TABLE II. Raw Materials Price Index (1986 = 100)

TABLEAU EXPLICATIF II. Indice des prix des matières brutes (1986 = 100)

	Index			Percentage change		Contribution to percentage change(1)		Relative importance of group

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) These indexes are preliminary.

(1) Ces indices sont provisoires.

(2) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.

(2) L'agrégation des indices par produits ou par industries devrait résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - Tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - Toutes les industries manufacturières sera posé égal.

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

(1) The bottom line in each series title block may contain, in order from left to right, the following: the CANSIM Databank code number (d nnnnnn), a numeric descriptor, a coverage measure, and a variability measure. The numeric descriptor is of the order ss-mm-nn-pppp-rr where

ss indicates the S-level commodity code (from 9 to 28)

mm indicates the M-level commodity code (from 14 to 43, 45 to 69)

nn indicates either a split of the M-level commodity, or 91, which indicates a special aggregation or 99, which indicates special details.

pppp indicates the PCG code (except for some special aggregations which include several PCGs).

rr indicates a split of a PCG.

The coverage measure for an elemental index is a symbol: E indicates a fully designed sample, S indicates an abbreviated sample, P indicates an indirect estimate. For a composite index the percentage of the coverage which is estimated from direct surveys (E + S) is given, occasionally these coverage measures are rounded to the nearest 5% to preserve confidentiality. The variability measure is given for some indexes to indicate the relative stability of the index estimate due to sampling. The most stable indexes are marked A, the least stable, D. For further information order Industrial Product Price Indexes 1981 = 100, Concepts and Methods (Catalogue 62-556).

(1) En lisant de gauche à droite, la ligne en-dessous de chaque titre des séries présente, en tout ou en partie, l'information suivante: le numéro de code "Databank" de CANSIM (D nnnnnn), un numéro d'identification numérique, une mesure du degré de couverture et une mesure de la variabilité. Le numéro d'identification numérique prend la forme générale ss-mm-nn-pppp-rr où:

ss indique le code du niveau S des produits (de 9 à 28)

mm indique le code du niveau M des produits (de 14 à 43, 45 à 69)

nn indique soit une composante du niveau M des produits, ou prend la valeur de 91 pour les agrégats spéciaux, ou de 99 pour les indices particuliers.

pppp indique le code GPP (sauf pour certains agrégats spéciaux qui comprennent plusieurs GPP)

rr indique une composante d'un GPP.

La mesure du degré de couverture pour les indices élémentaires est présentée à l'aide d'un symbole: E indique un échantillonnage exhaustif, S indique un échantillonnage sommaire et P indique une estimation indirecte. Pour les indices composites, la donnée en pourcentage représente une estimation du degré de couverture par échantillonnage direct (E + S). Ces mesures du degré de couverture sont parfois arrondies au 5% le plus près afin d'assurer la confidentialité. La mesure de la variabilité, donnée pour un certain nombre d'indices, indique la stabilité relative de l'indice en tant qu'estimation basée sur un échantillon. Les indices les plus stables sont cotés A, les moins stables, D. Pour plus de renseignements, commandez le document de référence: Indices des prix des produits industriels 1981 = 100, concepts et méthodes (n° 62-556 au catalogue).

Note: Indexes for the most recent six months shown are subject to revision.

Nota: Les indices figurant pour les six mois les plus récents sont sujets à révision.

- (1) The aggregation of indexes by commodities or by industries should produce the same grand total. When these totals occasionally differ due to rounding, the All Commodities Index shall be regarded as authoritative, and the All Manufacturing Industries is adjusted to match.
- (1) L'agrégation des indices par produits ou par industries devraient résulter en un même grand total. Lorsque ces totaux diffèrent occasionnellement en raison de l'arrondissement, l'indice total - tous les produits devra être considéré comme celui qui fait autorité, et l'indice total - toutes les industries manufacturières sera posé égal.
- (2) The numeric code to the right of the CANSIM databank number on the last line of each series is the 1980 Standard Industrial Classification (SIC) code. An explanation of the percentage figures (coverage measure) shown to the right of the SIC can be found at the end of Table 2. These coverage measures are rounded to the nearest 5% to preserve confidentiality.
- (2) Le code numérique à la droite du numéro Databank de CANSIM apparaissant à la ligne du bas de chaque série est le code de la Classification type des industries (CTI) de 1980. Une explication des données en pourcentage (mesure de degré de couverture) apparaissant à la droite du code CTI est disponible à la fin du tableau 2. Ces mesures de degré de couverture sont arrondies au 5% le plus près afin de préserver la confidentialité.

TABLE 4. Industrial Product Price Indexes, by Stage of Processing

(1) Monthly prices are collected and processed three times per annum.

(1) Des prix mensuels sont relevés et calculés trois fois par année.

(2) Indexes for the current year and previous year are subject to revision.

(2) Les indices pour l'année courante et pour l'année précédente sont sujets à révision.

TABLE 6. Raw Materials Price Indexes

EXPLANATION OF METHODS USED AND ADDITIONAL SOURCES FOR INDUSTRIAL PRICE INDEXES

Industrial Product Price Indexes, 1986 = 100

The Industrial Product Price Indexes (IPPI) measure price changes for major commodities sold by Canadian manufacturers. Elemental indexes are calculated for 1314 Principal Commodity Group (PCG) outputs as defined in the 1986 Input/Output (I/O) table. Weights used to aggregate commodity indexes are taken from the output or "Make" matrix of the I/O system which provides an integrated set of commodity values for all manufacturing industries.

Directly surveyed commodities are supported by formal sampling procedures and a quality rating is presented for commodities and aggregations of commodities. Such indexes are derived from prices reported for the 15th of the month or the nearest prior business day for comparable transactions.

Selected indexes are published about four weeks after the reference month in the *Daily Bulletin* (Catalogue 11-001) following a pre-announced schedule of release dates. Simultaneously, all series are available from CANSIM or on request. Catalogue 62-011, *Industry Price Indexes*, is released about four weeks after the *Daily Bulletin* release. Each series is identified with a CANSIM D number and with a commodity (PCG) or industry (SIC) identifier. Each release of numbers is subject to revision for six months, i.e., when a July index is released, the index for the preceding January becomes final. Exceptions to this rule are announced.

Price Surveys

About 10,000 prices are collected monthly from about 3,500 producers for goods sold, which are valued at the boundary of the establishment, wherein the cost of taxes collected at that point and transportation provided by public carriers beyond that point are excluded. Prices are reported for finely specified transactions wherein both the good and terms of sale are identified. Such collections are instituted for important commodities. Expansions are made to the samples where price movement has a regional dimension or where there are important flows of goods to export markets.

Sampling for any directly surveyed elemental index is usually done by a formal probability sampling procedure, wherein important producers are "must take" respondents and a random selection is taken from the smaller producers. Such samples are redrawn on a regular cycle as dictated by changes in the market. A given elemental index is usually supported by 12 to 15 price quotes, although some are derived from as few as 8 quotes or as many as 30 quotes.

EXPLICATION DES MÉTHODES UTILISÉES ET SOURCES SUPPLÉMENTAIRES DES INDICES DES PRIX INDUSTRIELS

Indices des prix des produits industriels, 1986 = 100

Les indices des prix des produits industriels (IPPI) mesurent les variations des prix des principaux produits vendus par les fabricants canadiens. Les indices élémentaires sont calculés pour 1314 groupes principaux des produits (GPP) tels que définis dans les tableaux d'entrées-sorties de 1986. Les poids servant à agréger les indices des produits proviennent de la matrice des sorties ou de "production" des tableaux d'entrées-sorties. Cette matrice présente un ensemble intégré de valeurs pour les produits à l'intérieur de l'ensemble des industries manufacturières.

Les produits faisant directement l'objet d'un sondage sont basés sur des procédures d'échantillonnage formelles, et une cote de qualité est présentée pour les produits et les agrégats de produits. Ces indices sont calculés à partir des prix déclarés pour le 15 du mois, ou le jour ouvrable précédent le plus proche pour des transactions comparables.

Un certain nombre d'indices sont publiés environ quatre semaines après la fin du mois de référence dans le *Quotidien* (n° 11-001F au catalogue), selon un calendrier de publication préalablement établi. Simultanément, toutes les séries sont disponibles dans CANSIM ou sur demande. La publication n° 62-011 au catalogue, *Indices des prix de l'industrie*, paraît quatre semaines environ après le communiqué dans le *Quotidien*. Chaque série est identifiée par un numéro D de CANSIM et par un identificateur de produits (GPP) ou de branche d'activité (CTI). Les chiffres publiés pour les six derniers mois sont sujets à révision. Ainsi, lorsque l'indice de juillet est publié, l'indice pour le mois de janvier précédent devient final. Les exceptions à cette règle sont signalées.

Enquêtes des prix

Environ 10,000 prix sont recueillis chaque mois auprès d'environ 3,500 producteurs pour des biens vendus qui sont évalués à la limite de l'établissement, de sorte que les taxes prélevées à ce point et le coût du transport fourni par les transporteurs communs au-delà de ce point sont exclus. Les prix sont relevés pour des transactions à un niveau très détaillé, qui permet d'identifier le bien et les conditions de vente. De tels relevés sont institués pour les produits importants. Des élargissements sont apportés aux échantillons pour lesquels le mouvement des prix a une dimension régionale, ou pour lesquels il existe un important marché pour l'exportation.

L'échantillonnage pour tout indice élémentaire faisant directement l'objet d'un sondage se fait habituellement par une méthode d'échantillonnage probabiliste, selon laquelle les producteurs importants sont des répondants "obligatoires", tandis que l'on procède à une sélection aléatoire des producteurs moins importants. Ces échantillons sont reconstruits régulièrement, suivant l'évolution du marché. Un indice élémentaire donné repose habituellement sur 12 à 15 prix, bien que certains peuvent utiliser aussi peu que 8 prix, ou jusqu'à 30 prix.

About 700 of the 1314 PCGs in the manufacturing sector are accommodated by direct survey and these account for about 85% of the value of manufacturing output in 1986. The price movement for the remaining 600 PCGs is estimated indirectly from either directly priced PCGs or through borrowing price movement from other price series.

Weight Base

Commodity and industry weights are taken from the "Make" matrix of the 1986 Input/Output table which, in turn, is derived from 1986 values reported for the Census of Manufacturers and edited to conform to the 1980 Standard Industrial Classification. Within-commodity weights can change in December of each year to reflect major changes in production patterns.

Formula

Chained series of fixed weighted price indexes are calculated by a linking procedure whereby more recent varieties and changes to establishments are introduced systematically, as required, in December of each year. Weights from the commodity level through higher levels of aggregation are held constant.

The general formula used for the main aggregations describes the price movement of a specified group of commodities where w^i are the values of the output of each commodity:

Environ 700 des 1314 GPP du secteur de la fabrication font l'objet d'une enquête directe, qui couvrent environ 85% de la valeur de la production manufacturière en 1986. Le mouvement des prix des 600 GPP restants est estimé indirectement à partir de GPP faisant directement l'objet d'un sondage, ou en empruntant le mouvement des prix d'autres séries de prix.

Sources des poids

Les poids des produits et des branches d'activités proviennent de la matrice "production" du tableau d'entrées-sorties de 1986, laquelle à son tour est établie à partir des valeurs de 1986 déclarées pour le recensement des manufactures, et rectifiées afin d'être conforme à la Classification type des industries de 1980. Les poids internes des produits peuvent changer en décembre de chaque année afin d'appréhender les changements importants dans les schémas de la production.

Formule

Les séries en chaîne des indices de prix à pondération fixe sont calculées par une méthode de raccordement suivant laquelle les plus récentes variétés et les changements au niveau de l'univers des entreprises sont incorporés systématiquement, selon les besoins, en décembre de chaque année. Toutefois, les pondérations du niveau des produits jusqu'aux niveaux plus élevés d'agrégation sont maintenues constantes.

La formule générale servant au calcul des agrégations principales décrit les mouvements de prix d'un groupe donné de produits, dans laquelle w^i sont les valeurs de la production de chaque produit:

$$P_{t/o}^{(agg)} = \sum_i \frac{w^i}{\sum w^i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w^i is the transaction value of the element i in the base period;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période t pour l'agrégat défini;

w^i est la valeur de transaction de l'élément i au cours de la période de référence;

$P_{t/o}^i$ est l'indice de prix de l'élément i, désignant sa variation de prix entre la période de référence et la période t;

\sum_i signifie la sommation de tous les éléments i dans l'agrégat défini.

Historical Data

Historical series on the 1986 base for the Industry Price Indexes are available on CANSIM. The historical series are computed for the industry indexes classified under the 1980 Standard Industrial Classification (SIC) and for commodity indexes classified under the Principal Commodity Groups (PCG) classification. The historical series were obtained by linking together movements from the 1986-based Industrial Product Price Indexes (IPPI) series and the corresponding 1981-based Industrial Product Price Indexes (IPPI) series, using the year 1986 as the linking period. An explanatory note on the methods used to compute the historical series, as well as a set of concordance tables between both set of IPPI series are available to the public.

Reference Documents

62-558 Industry Price Indexes, 1986 = 100: Users' Guide, \$40.00.

This publication describes briefly the economic content of the series and presents a short description of different aggregations produced. In the tables the weighting patterns for both commodities and commodity groupings are shown. Descriptions of the characteristics of the elemental indexes are provided. Comments on index use are also provided.

62-556 Industrial Product Price Indexes, 1981 = 100, Concepts and Methods, \$25.00.

This publication describes the economic content of the series within the framework of the system of national accounts and describes how this affects price index methodology. Sampling and pricing methods are described, as are index calculation and aggregation procedures.

A glossary of terms is also provided.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

Données historiques

Les séries historiques sur la base 1986 pour les Indices des prix de l'industrie sont disponibles sur CANSIM. Les séries historiques sont calculées pour les indices des industries suivant la Classification type des industries (CTI) de 1980 et pour des indices des produits suivant la classification des Groupes principaux des produits (GPP). Les séries historiques furent obtenues en raccordant ensemble les mouvements des séries des indices des prix des produits industriels (IPPI) basées sur 1986 et des séries correspondantes des indices des prix des produits industriels (IPPI) basées sur 1981, l'année 1986 ayant servi de période de raccordement. Une note explicative sur les méthodes utilisées pour calculer les séries historiques de même qu'un ensemble de tableaux montrant les concordances entre les deux ensembles de séries IPPI sont disponibles au public.

Documents de référence

62-558 Indices des prix de l'industrie, 1986 = 100: Guide aux utilisateurs, 40,00 \$.

Cette publication précise sommairement le contenu économique des séries dans un cadre général, de même qu'une brève description des différentes structures d'agrégation. Les tableaux contiennent les schémas de pondération à la fois pour les produits et les agrégats de produits. Y figurent également une description des caractéristiques des indices élémentaires. La publication contient des commentaires sur l'utilisation des indices.

62-556 Indices des prix des produits industriels, 1981 = 100, Concepts et méthodes, 25,00 \$.

Cette publication précise le contenu économique des séries dans le cadre général du système des comptes nationaux, et son impact sur la méthodologie des indices de prix. Elle contient une description des méthodes d'échantillonnage et d'observation des prix, de même que des méthodes de calcul et d'agrégation des indices.

La publication contient également un glossaire.

RAW MATERIALS PRICE INDEXES (1986 = 100)

The Raw Materials Price Indexes (RMPI) measure price changes for the purchase of raw materials by Canadian industry. The term "raw material" refers either to a commodity that is sold for the first time after being extracted from nature, or a substitutable recycled product (e.g. metal scrap). For example wheat is considered as a raw material, but wheat flour is not, iron ore is but not pig iron, coal but not electricity. Approximately eighty commodities are priced in the index, grouped into seven major components.

The index and the major group indexes, on a 1986 time base, are published monthly in the Daily Bulletin approximately four weeks after the end of the reference month. They are also available at that time on CANSIM in matrix 2009.

These indexes are a continuation of the previously published Raw Materials Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

The index covers purchases of domestically produced and imported goods by Canadian industry, generally for further processing, and does not cover exports or flows of raw materials directly to final demand (principally foodstuffs). For example, potatoes bought by food processing manufacturers (for the manufacture of potato chips, or frozen french fries) are included in the index, but those bought by consumers directly are not.

As a purchasers' price index, prices should include all charges purchasers incur to bring a commodity to the establishment gate. Thus transportation charges, taxes net paid and custom duties are all included. So also are the effects of subsidies, if any are paid to the purchaser.

While prices are ideally collected from the purchaser, there are several cases where other well known prices are used instead: for example, marketing board prices for eggs and milk, and stockyard prices for some livestock. In a few cases, where data for unprocessed materials are not available, prices are taken for a similar commodity at the next stage of processing as occurred for some non-ferrous metals. A detailed description of the characteristics of prices for any commodity is available from Prices Division on request.

INDICES DES PRIX DES MATIÈRES BRUTES (1986 = 100)

Les indices des prix des matières brutes (IPMB) mesurent les variations des prix d'achat des matières brutes par les industries canadiennes. L'expression "matières brutes" désigne soit un produit vendu pour la première fois après son extraction de la nature, soit un produit substitut recyclé (tel les déchets de métaux). Ainsi, le blé est considéré comme une matière brute, mais non la farine de blé, le minerai de fer mais non la fonte en gueuses, le charbon mais non l'électricité. Les prix d'environ quatre-vingt produits, regroupés en sept composantes principales, sont recueillis aux fins de l'indice.

L'indice d'ensemble et les indices des composantes principales, ayant comme période de référence 1986, sont publiés mensuellement dans le Quotidien de Statistique Canada, environ quatre semaines après la fin du mois de référence. Ces indices sont également disponibles dans la matrice 2009 de CANSIM.

Ces indices constituent la suite des Indices des prix des matières brutes, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990, et répétés dans le numéro de décembre de la présente publication.

L'indice couvre les achats par les industries canadiennes de biens produits au Canada et de biens importés, en vue d'une transformation subséquente. L'indice ne couvre cependant pas les exportations, ni les matières brutes qui se rendent directement à la demande finale (principalement les denrées alimentaires). Par exemple, les pommes de terre achetées par les fabricants de produits alimentaires (pour la production de croustilles ou de pommes de terre congelées) sont pris en compte dans l'indice, alors que celles directement achetées par les consommateurs ne le sont pas.

Comme il s'agit d'un indice des prix d'achat, les prix devraient comprendre tous les frais supportés par l'acheteur pour faire parvenir le produit à la porte de l'établissement. Les frais de transport, les taxes nettes payées et les droits de douane, de même que les effets de toute subvention versée à l'acheteur, sont donc incorporés aux prix.

Bien qu'idéalement, les prix sont directement recueillis auprès des acheteurs, il existe en pratique un certain nombre de cas où des prix provenant d'autres sources bien connues sont utilisés: par exemple, les prix des offices de commercialisation des oeufs et du lait, les prix des parcs à bestiaux. Dans un certain nombre de cas où les données pour les matières non transformées ne sont pas disponibles, les prix sont prélevés pour un produit semblable à l'étape suivante de transformation. Tel est le cas notamment pour certains métaux non ferreux. La Division des prix fera parvenir sur demande une description détaillée des caractéristiques des prix d'un produit donné.

Prices collected each month are those in effect on the 15th of the month or the nearest prior business day. In a few cases, prices used are averages for the week which includes the 15th. Prices are reported directly to Statistics Canada or are taken from trade publications or from publications of other government departments.

Weights were derived from the 1986 Input/Output tables which provide values at purchasers prices of commodities purchased as intermediate inputs.

Indexes for aggregates of individual raw materials are calculated according to the following formula:

$$P_{t/o}^{(agg)} = \sum_i \frac{w_i}{\sum w_i} \cdot P_{t/o}^i$$

$P_{t/o}^{(agg)}$ denotes the composite price index movement between the base period o and time t for the defined aggregate;

w_i is the transaction value of the element i in 1986;

$P_{t/o}^i$ is the price index for element i, meaning its price change from the base period o to time t;

\sum_i indicates summation over all elements i in the defined aggregate.

Les prix recueillis chaque mois sont ceux en vigueur le 15 du mois ou le jour ouvrable qui le précède immédiatement. Dans certains cas, les prix relevés représentent la moyenne des prix de la semaine englobant le 15 du mois. Les prix sont soit déclarés directement à Statistique Canada, soit tirés de revues spécialisées ou de publications d'autres organismes gouvernementaux.

Les pondérations furent dérivées des tableaux d'entrées-sorties de 1986, qui fournissent les valeurs aux prix d'achat des produits acquis à titre d'entrées intermédiaires.

Les indices pour les agrégats de matières brutes individuelles sont dégagés à l'aide de la formule suivante:

$P_{t/o}^{(agg)}$ dénote le mouvement de l'indice composite de prix entre la période de référence o et la période courante t pour l'agrégat spécifié;

w_i est la valeur de transaction de l'élément i en 1986;

$P_{t/o}^i$ est l'indice de prix de l'élément i, c'est-à-dire son changement de prix de la période de référence o à la période courante t;

\sum_i indique la sommation sur tous les éléments i faisant partie de l'agrégat spécifié.

Within individual commodity indexes, the prices are weighted according to their market share in a recent year. In a few instances, where data are not available, the price quotations are equally weighted.

À l'intérieur des indices individuels des produits, les prix sont pondérés selon leurs parts du marché pour une année récente. Dans quelques cas où les données ne sont pas disponibles, les cotes de prix ont des pondérations équivalentes.

ELECTRIC POWER SELLING PRICE INDEXES (NON-RESIDENTIAL), 1986 = 100

Electric Power Selling Price Indexes are published on a regional and provincial basis for two broad industrial customer categories of sales; for bills less than 5000 KW and for sales of 5000 KW or more. Prices are reported by electric utilities for non-interruptible power contracts with manufacturing, service, and other Canadian industrial customers. Monthly prices are collected from all major generating and distributing utilities three times a year. The resulting indexes are released with other monthly Industry Price Indexes for April, August and December of each year. The indexes have 1986 as a time reference base and the weights used are 1986 company revenues from sales of electricity, as collected by Prices Division.

The formula used to calculate the Electric Power Selling Price Indexes is a fixed weighted index formulation, which is the same as that described for the Industrial Product Price Indexes, 1986=100, technical notes presented above. The indexes are available on CANSIM in matrix 2020. Indexes for the current year and the previous year are subject to revision.

These indexes are a continuation of the previously published Electricity Selling Price Indexes, 1981=100. The new, 1986=100 indexes can be linked with their equivalents in the 1981=100 series using the link factors which were released in the July 1990 issue and repeated in the December issue of this publication.

For further details, please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone 951-3350, facsimile (613)951-2848.

INDICES DES PRIX DE VENTE DE L'ÉNERGIE ÉLECTRIQUE (NON RÉSIDENTIELLE), 1986 = 100

Les indices des prix de vente de l'énergie électrique sont publiés, par région et par province, pour deux grandes catégories de clients industriels, soit les factures de moins de 5000 kW et les factures de 5000 kW et plus. Les prix sont déclarés par les services publics d'électricité pour des contrats d'énergie non susceptible d'être interrompue, conclus avec des manufacturiers, des services et d'autres clients industriels canadiens. Les prix mensuels sont relevés trois fois par année auprès de tous les grands services de production et de distribution d'énergie. Les indices établis, accompagnant d'autres indices mensuels des prix de l'industrie, sont diffusés chaque année aux mois d'avril, d'août et de décembre. Les indices ont comme période de référence 1986, et les pondérations sont fondées sur les recettes au titre des ventes qu'ont touchées les entreprises en 1986, telles que recueillies par la Division des prix.

Le calcul des indices des prix de vente de l'énergie électrique se fait à l'aide d'une formule d'indice à pondération fixe, identique à celle décrite ci-dessus dans les notes techniques des Indices des prix des produits industriels, 1986=100. Les indices sont disponibles par l'entremise de CANSIM sur la matrice 2020. Les indices de la présente année et de l'année précédente sont sujets à révision.

Ces indices constituent la suite des indices des prix de vente de l'énergie électrique, 1981=100, précédemment publiés. Les nouvelles séries basées 1986=100 peuvent être raccordées à leurs séries équivalentes basées 1981=100 en utilisant les facteurs de raccordement. Ces derniers sont publiés dans le numéro de juillet 1990 et répétés dans le numéro de décembre de la présente publication.

Pour plus de renseignements, veuillez contacter la Division des prix, Statistique Canada, Ottawa, Ontario K1A 0T6, téléphone 951-3350, télécopieur (613)951-2848.

CONSULTING ENGINEERS' OUTPUT PRICE INDEXES (1992 = 100)

The consulting engineers' output price indexes (CEPI) measure the price changes of the services provided by consulting engineers. These services, which include advisory work, design work and supervision of its implementation, and project management, are provided for a variety of projects, and in different parts of the country. The data published in Tables 7 and 8 include indexes (column A in the tables) for 13 different fields of specialization, corresponding to those in the Survey of Consulting Engineers. For some fields of specialization indexes for different regions of the country are provided. An index for foreign projects is also given.

Indexes are published annually, approximately three months after the end of each calendar year. They are available at that time on CANSIM in matrices 2047, 2048 and 2049, or from Prices Division. Indexes for the latest year are subject to revision.

These indexes, dating from 1989, are the first to cover these activities. They are based on information from a sample of consulting engineering firms in Canada. The overall indexes are calculated by combining indexes for three separate measures : wage and salary rates, realized net multipliers (or fee-to-direct salary ratios), and output per unit of labour input (or labour productivity). Indexes are published for the changes in wage and salary rates, and in realized net multipliers, in columns B and C, respectively.

Respondents provide wage and salary movements, as they determine rates, usually annually. For each respondent this is the average of changes in the rate that would be paid to someone of certain abilities with a certain level of experience. It is not the change in average wages and salaries paid, because that would change with the mix of employees and experience. Respondents provide information on their realized net multipliers annually at the end of their financial year. Each respondent provides individual multipliers for each segment of activity for which the mark-up may differ. This may be as detailed as a specialization in one region, but the same multiplier may apply to more than one specialization or more than one region. In those cases the report is used as an observation in each of the areas covered. As the multipliers are realized figures, after the year is over, they reflect what was actually earned as a ratio of direct salaries, rather than what might have been intended. Productivity adjustments are calculated at a more aggregative level and applied evenly to all regions and specialities.

INDICES DE PRIX DES SORTIES DES SERVICES D'INGÉNIEURS-CONSEILS (1992 = 100)

Les indices de prix des sorties des services d'ingénieurs-conseils (IPIC) mesurent les variations de prix des services fournis par les ingénieurs-conseils. Ces services, qui comprennent des services de consultation, des travaux de conception et la surveillance de leur mise en oeuvre et des services de gestion de projets, sont offerts pour une variété d'activités et dans différentes régions du pays. Les données publiées aux tableaux 7 et 8 comprennent les indices (colonne A dans les tableaux) de 13 différents domaines de spécialisation correspondant à ceux qui font l'objet de l'Enquête auprès des ingénieurs-conseils. Dans certains domaines de spécialisation, les indices sont établis pour différentes régions du pays. On trouve également un indice des projets réalisés à l'étranger.

Les indices sont publiés chaque année, environ trois mois après la fin de l'année civile. On peut alors les extraire de la base CANSIM dans les matrices 2047, 2048 et 2049 ou les obtenir auprès de la Division des prix. Les indices de la dernière année font l'objet d'une révision.

Ces indices, qui remontent à 1989, sont les premiers à couvrir de telles activités. Ils sont fondés sur des renseignements obtenus auprès d'un échantillon des entreprises d'ingénieurs-conseils du Canada. Les indices d'ensemble sont calculés en groupant les indices établis selon trois différentes mesures : les taux de salaires et de traitements, les multiplicateurs nets réels (ou les ratios des honoraires aux traitements directs) et la production par unité de main-d'oeuvre (ou productivité du travail). Les indices présentent, dans les colonnes B et C respectivement, les variations des salaires et des traitements, ainsi que des multiplicateurs nets réels.

Les répondants fournissent, chaque année habituellement, les données sur les mouvements des salaires et des traitements, car ces mouvements déterminent les taux. Pour chaque répondant, il s'agit de la variation moyenne du taux de rémunération qui serait versé à une personne possédant certaines compétences et une certaine expérience. Il ne s'agit pas de la variation des salaires et des traitements moyens versés, car ces derniers varient en fonction de la composition et de l'expérience des employés. Chaque année, à la fin de leur exercice, les répondants fournissent les données sur leurs multiplicateurs nets réels. Chaque répondant fournit ses multiplicateurs propres pour chaque segment d'activité pour lequel la majoration peut varier. Les renseignements fournis peuvent être aussi détaillés qu'une spécialisation dans une région donnée; cependant, on peut appliquer le même multiplicateur à plus d'une spécialisation ou d'une région. Dans ces cas, le rapport sert de rapport d'observation pour chacune des régions étudiées. Comme les multiplicateurs sont réels, ils représentent, à la fin de l'année, la rémunération réelle en ratio des traitements directs plutôt que la rémunération prévue. Les ajustements de la productivité sont calculés à un niveau plus agrégatif et appliqués équitablement à toutes les régions et spécialisations.

The finest market identified is for a field of specialization in a region. Six regions in Canada are identified: Atlantic provinces, Quebec, Ontario, Manitoba/Saskatchewan, Alberta, and British Columbia. Regional indexes are calculated for buildings, transportation, municipal services, and other environmental services. Canada indexes only are calculated for individual industrial specialties. However, the index for all industrial services differs from region to region because of the different mix of industrial projects.

The indexes at the finest level of detail are calculated as unweighted geometric averages of the returns from individual respondents. These indexes are aggregated to more general indexes using fixed weights. For combining regional indexes within a field of specialization the geographical distributions from the Survey of Capital Expenditures, 1989, 1990 and 1991 were used. For combining indexes for fields of specialization weights were taken from the Survey of Consulting Engineers for 1989 and 1991.

For further information: Please contact Prices Division, Statistics Canada, Ottawa, Ontario K1A 0T6. For data only please, contact the Information Unit in Prices Division at 613-951-3350, (fax: 613-951-2848), or any regional office, whose addresses and phone numbers are on the inside front cover of this book. For further information on concepts and methods, contact Bernard Lupien (613-951-9605).

L'indice le plus détaillé est celui du domaine de spécialisation dans une région donnée. Il existe six régions au Canada : les provinces de l'Atlantique, le Québec, l'Ontario, le Manitoba/Saskatchewan, l'Alberta et la Colombie-Britannique. Les indices des régions sont calculés pour les bâtiments, les transports, les services municipaux et d'autres services environnementaux. Les indices pour le Canada seulement sont calculés pour chaque spécialisation industrielle. Cependant, l'indice de l'ensemble des services aux entreprises diffère d'une région à l'autre en raison de la variété des projets des entreprises.

Les indices les plus détaillés sont calculés en tant que moyennes géométriques non pondérées des chiffres fournis par les répondants. Ces indices sont groupés sous forme d'indices plus généraux à pondération fixe. Pour grouper les indices régionaux d'un même domaine de spécialisation, on se fonde sur la répartition géographique de l'Enquête sur les dépenses d'immobilisations de 1989, de 1990 et de 1991. Pour grouper les indices des domaines de spécialisation, on se sert des poids appliqués dans le cadre de l'Enquête auprès des ingénieurs-conseils de 1989 et de 1991.

Pour plus de renseignements, communiquer avec la Division des prix, Statistique Canada, Ottawa (Ontario) K1A 0T6. Pour obtenir des données seulement, communiquer avec l'Unité de l'information de la Division des prix au numéro 613-951-3350 (téléc. : 613-951-2848) ou avec les bureaux régionaux dont les coordonnées figurent au dos du plat supérieur de la présente publication. Pour plus de renseignements sur les concepts et les méthodes, communiquer avec Bernard Lupien (613-951-9605).

Hire our team of researchers for \$56 a year

Notre équipe de chercheurs est à votre service pour 56 \$ par année

Subscribing to *Perspectives on Labour and Income* is like having a complete research department at your disposal. Solid facts. Unbiased analysis. Reliable statistics.

But *Perspectives* is more than just facts and figures. It offers authoritative insights into complex labour and income issues, analyzing the statistics to bring you simple, clear summaries of labour market and income trends.

Our team of experts brings you the latest labour and income data. Each quarterly issue provides:

- topical articles on current labour and income trends
- more than 50 key labour and income indicators
- a review of ongoing research
- information on new surveys

As a special bonus, twice a year you will also receive *The Labour Market Review*, giving you timely analysis on labour market performance over the previous six months or year.

And all for only \$56!

Thousands of Canadian professionals turn to *Perspectives* to discover emerging trends in labour and income and to stay up to date on the latest research findings. As a subscriber, you will get the inside story.

We know you'll find *Perspectives* indispensable. GUARANTEED. If you aren't convinced after reading the first issue, we'll give you a FULL REFUND on all outstanding issues. Order your subscription to *Perspectives* today (Cat. No. 75-0010XPE).

ORDER NOW!

For only \$56 (plus \$3.92 GST) you will receive the latest labour and income research (4 issues per year). Subscription rates are US\$68 for U.S. customers and US\$80 for customers in other countries.

Fax your VISA or MasterCard order to: (613) 951-1584.

Call toll free: 1-800-267-6677. Or mail to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Ave., Ottawa, Ontario K1A 0T6. Or contact your nearest Statistics Canada Reference Centre listed in this publication.

S'abonner à *L'emploi et le revenu en perspective*, c'est disposer d'une division entière de chercheurs à votre service. Des faits solides. Des analyses objectives. Des statistiques fiables.

La publication n'a pas que des faits et des chiffres. Elle offre également des analyses de fond sur des questions complexes touchant l'emploi et le revenu, de façon à fournir des indications claires et précises sur les

tendances actuelles du marché du travail et des revenus.

Notre équipe de spécialistes met à votre disposition des données récentes sur l'emploi et le revenu. Dans chacun des numéros trimestriels, vous trouverez :

- des articles de fond sur l'emploi et le revenu
- plus de 50 indicateurs clés de l'emploi et du revenu
- un aperçu de la recherche en cours
- de l'information sur les nouvelles enquêtes

En prime, vous recevrez le *Bilan du marché du travail* deux fois l'an. Vous disposerez ainsi d'une analyse à jour de la situation du marché du travail pour les six derniers mois ou la dernière année.

Tout cela pour 56 \$ seulement!

Des milliers de professionnels au Canada consultent *Perspective* pour connaître les tendances de l'emploi et du revenu, ainsi que les plus récents résultats de recherche. Votre abonnement vous permettra de connaître tous les faits.

Nous savons que *L'emploi et le revenu en perspective* deviendra pour vous un outil indispensable. C'EST GARANTI. Si vous n'êtes pas satisfait après avoir lu le premier numéro, nous vous REMBOURSERONS le montant payé pour les numéros à venir. Abonnez-vous à *Perspective* (n° 75-0010XPF au cat.) dès aujourd'hui.

ABONNEZ-VOUS DÈS MAINTENANT!

Pour 56 \$ seulement (TPS de 3,92 \$ en sus), vous recevrez les plus récentes recherches sur l'emploi et le revenu (quatre numéros par année). L'abonnement est de 68 \$ US aux États-Unis et de 80 \$ US dans les autres pays. Faites parvenir votre commande par télécopieur (VISA ou MasterCard) au (613) 951-1584, par téléphone (sans frais) au 1-800-267-6677, par courrier à Statistique Canada, Division du marketing, Vente et service, 120, avenue Parkdale, Ottawa (Ontario) K1A 0T6. Ou communiquez avec le Centre de consultation de Statistique Canada le plus près. (Voir la liste dans la présente publication).

MERCI DE VOTRE COMMANDE!

Statistique
CanadaStatistics
Canada

Canada

Are you getting your information on the Canadian economy "first-hand"?

Chances are, you spend hours reading several newspapers and a handful of magazines trying to get the whole economic picture – only to spend even more time weeding out fiction from fact! Wouldn't it be a great deal more convenient (and much more effective) to go straight to the source?

Join the thousands of successful Canadian decision-makers who turn to Statistics Canada's *Canadian Economic Observer* for their monthly briefing. Loaded with first-hand information, collectively published nowhere else, CEO is a quick, concise and panoramic overview of the Canadian economy. Its reliability and completeness are without equal.

A single source

Consultations with our many readers – financial analysts, planners, economists and business leaders – have contributed to CEO's present, widely-acclaimed, two-part format. The **Analysis Section** includes thought-provoking commentary on current economic conditions, issues, trends and developments. The **Statistical Summary** contains the complete range of hard numbers on critical economic indicators: markets, prices, trade, demographics, unemployment and more.

More practical, straightforward and user-friendly than ever before, the *Canadian Economic Observer* gives you more than 150 pages of in-depth information in one indispensable source.

Why purchase CEO?

As a subscriber, you'll be directly connected to Statistics Canada's economic analysts – names and phone numbers are listed with articles and features. You'll also receive a copy of CEO's annual **Historical Statistical Supplement** – at no additional cost.

So why wait for others to publish Statistics Canada's data second-hand when you can have it straight from the source? Order your subscription to the *Canadian Economic Observer* today.

The *Canadian Economic Observer* (catalogue no. 10-2300XPB) is \$220 annually in Canada, US\$260 in the United States and US\$310 in other countries. Highlights of the **Canadian Composite Leading Indicator** (catalogue no. 11F0008XFE) are available by fax – the same day of release – for \$70 annually in Canada and US\$70 in the United States.

To order, write to: Statistics Canada, Marketing Division, Sales and Service, 120 Parkdale Avenue, Ottawa, Ontario, K1A 0T6 or contact the nearest Statistics Canada Reference Centre listed in this publication. If more convenient, fax your order to 1-613-951-1584 or call toll-free 1-800-267-6677 and use your VISA or MasterCard.

Recevez-vous directement vos informations sur l'économie canadienne?

Il est probable que vous passez des heures à lire plusieurs journaux et un paquet de revues pour essayer d'avoir une vue complète de la situation économique, et ensuite passer encore plus de temps à séparer le réel de ce qui ne l'est pas. Ne serait-il pas plus pratique (et beaucoup plus efficace) de remonter directement à la source?

Joignez-vous aux milliers de décideurs canadiens gagnants qui lisent *L'Observateur économique canadien* pour leur séance de rapport mensuelle. Rempli de renseignements disponibles nulle part ailleurs, L'OEC permet d'avoir une vue générale rapide et concise de l'économie canadienne. Il est inégalé par sa fiabilité et son exhaustivité.

Une seule source

Les consultations que nous avons eues avec nos nombreux lecteurs, des analystes financiers, des planificateurs, des économistes et des chefs d'entreprise, nous ont permis de présenter L'OEC dans son format actuel en deux parties, qui a été bien accueilli. La **section de l'analyse** contient des commentaires qui donnent à réfléchir sur la conjoncture économique, ses problèmes, ses tendances et ses développements. L'**aperçu statistique** contient l'ensemble complet des chiffres réels pour les indicateurs économiques essentiels : les marchés, les prix, le commerce, la démographie, le chômage, et bien d'autres encore.

Plus pratique, plus simple, plus facile à utiliser qu'auparavant, *L'Observateur économique canadien* vous offre plus de 150 pages de renseignements poussés sous une seule couverture.

Pourquoi acheter L'OEC?

En tant qu'abonné à L'OEC, vous êtes directement relié aux analystes économiques de Statistique Canada : des noms et des numéros de téléphone sont cités dans les articles et les rubriques. Vous recevrez également un exemplaire du **Supplément statistique historique** annuel à titre gracieux.

Pourquoi devez-vous donc attendre que d'autres publient les données de Statistique Canada qu'ils ont reprises alors que vous pouvez les obtenir directement à la source? Abonnez-vous à *L'Observateur économique canadien* dès aujourd'hui.

Le prix de l'abonnement annuel à *L'Observateur économique canadien* (n° 10-2300XPB au catalogue) est de 220 \$ au Canada, de 260 \$ US aux États-Unis et de 310 \$ US dans les autres pays. Les faits saillants de l'**Indicateur composite avancé** (n° 11F0008XFF au catalogue) sont offerts par télécopieur – le jour même de leur parution – pour 70 \$ par année au Canada et 70 \$ US aux États-Unis.

Pour commander, écrivez à : Statistique Canada, Division du marketing, Vente et service, 120, av. Parkdale, Ottawa (Ontario) K1A 0T6, ou adressez-vous au Centre de consultation de Statistique Canada le plus proche de chez vous et dont la liste figure dans cette publication. Si vous le préférez, vous pouvez envoyer votre commande par télécopieur au 1-613-951-1584, ou téléphoner sans frais au 1-800-267-6677 et utiliser votre carte VISA ou MasterCard.

Don't let this happen to you!

Ne vous laissez pas dépasser par les événements!

Imagine you're called upon to make a really important business decision. You spend some anxious days weighing your options. You examine the available data. Finally, you make your decision...

...only to discover too late that your information was incomplete or outdated!

If you've ever experienced this type of frustration... or if your reputation ever depends on the quality of the data you refer to... **Infomat** is for you.

Infomat is your fastest and easiest way to keep on top of important Canadian economic and social trends. Since it comes to you weekly – not daily – issues won't pile up unread. And, in just one publication, you'll have the answers to almost anything:

- ✓ price indexes
- ✓ manufacturing shipments and orders
- ✓ imports and exports
- ✓ labour market conditions, and
- ✓ dozens of key social and economic indicators!

And because **Infomat** is based on over 100 ongoing Statistics Canada surveys, no other source is more timely or more reliable.

Infomat is specially designed and written for you – a busy manager with no time to waste!

Imaginez que vous devez prendre une décision de gestion très importante. Vous vous faites du mauvais sang pendant quelques jours à évaluer vos options. Vous examinez les données disponibles. Vous vous décidez enfin...

... pour vous rendre compte trop tard que vous vous êtes fondé sur de l'information incomplète ou périmée!

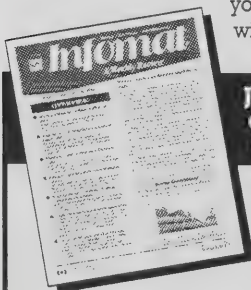

Si vous avez déjà vécu ce genre de situation... ou si vous devez un jour miser votre réputation sur la qualité des données que vous avancez... **Infomat** est pour vous.

Infomat est la façon la plus rapide et la plus facile de se tenir au courant des tendances économiques et sociales importantes au Canada. Comme il s'agit d'un hebdomadaire – non d'un quotidien – vous aurez le temps de le lire. Et dans une seule et même publication, vous trouverez réponse à presque tout :

- ✓ indices de prix
- ✓ livraisons et commandes des fabricants
- ✓ importations et exportations
- ✓ situation du marché du travail, et des
- ✓ dizaines d'indicateurs socio-économiques clés!

Et comme **Infomat** est fondé sur plus de 100 enquêtes permanentes de Statistique Canada, aucune autre source n'est plus à jour ou plus fiable.

Infomat est conçu et rédigé pour des gens comme vous – des gestionnaires qui n'ont pas de temps à perdre!
